In nearly two decades since Samuel P. Huntington proposed his influential and troubling ‘clash of civilizations’ thesis, nationalism has only continued to puzzle and frustrate commentators, policy analysts and political theorists. No consensus exists concerning its identity, genesis or future. Are we reverting to the petty nationalisms of the nineteenth century or evolving into a globalized, supranational world? Has the nation-state outlived its usefulness and exhausted its progressive and emancipatory role? Opening with powerful statements by Lord Acton and Otto Bauer – the classic liberal and socialist positions, respectively – Mapping the Nation presents a wealth of thought on this issue: the debate between Ernest Gellner and Miroslav Hroch; Gopal Balakrishnan’s critique of Benedict Anderson’s seminal Imagined Communities; Partha Chatterjee on the limitations of the Enlightenment approach to nationhood; and contributions from Michael Mann, Eric Hobsbawm, Tom Nairn, and Jürgen Habermas.

Decision-making is a process of choosing from possible courses of action in order to attain goals and objectives. Nobel laureate Herbert Simon wrote that the whole process of managerial decision-making is synonymous with the practice of management. Decision-making is at the core of all managerial functions. Planning, for example, involves the following decisions: What should be done? When? How? Where? By whom? Other managerial functions, such as organizing, implementing, and controlling, rely heavily on decision-making.Decision by Objectives is an invaluable book about the art and science of decision-making. It presents a very practical approach to decision-making that has a sound theoretical foundation, known as the analytic hierarchy process. Intended for both the student and the professional, the book includes approaches to prioritizing, evaluating alternative courses of action, forecasting, and allocating resources. By focusing on objectives rather than alternatives alone, it shows the reader how to synthesize information from multiple sources, analyses, and perspectives. The methods presented have been gaining popularity throughout the world.

Each chapter focuses on a specific concept or doctrine that is necessary to determine criminal liability (e.g. actus reus, mens rea, defences, inchoate offences). Throughout the book the authors also highlight and discuss some recent legislative and judicial developments that broaden the scope of criminal liability in our modern culture of control"--Back cover.

Analyses the international response to the crisis in Kosovo, and its broader implications by examining its diplomatic, military and humanitarian features. Unravelling these implications can be challenging as it remains an event replete with paradoxes - the originality of this book's approach lies in its exploration of these paradoxes. The crisis in Kosovo has been a headline grabbing event - a serious study of the implications of the conflict on wider European security issues and institutions is urgently required.

This book presents a systematic, in-depth, and comparative analysis of the role of the EU in the process of international state-building and is one of the first comprehensive books to do so at an international level. Taking the case of Kosovo, it examines the EU's role in the birth of a state in comparison to other international actors from 1999 to 2008 and moves on to analyse the EU's role in norm diffusion in the post-independence period (2008-2020). Throughout the book, the author draws parallel analyses with broader debates and scholarly literature regarding the EU's role as a state-builder or norm-diffuser. Combining a liberal peace thesis framework with the normative power Europe (NPE) approach, it analyses how successful the EU and other international actors were in the diffusion of tangible and normative impacts in the process of state-building in Kosovo (1999-2008), along with the EU's diffusion of normative impact from 2008 to 2020. Finally, it scrutinises the role of the EU and other international actors in the processes of state-building through transference tools (funding) and overt tools (political role). This book will be of key interest to scholars and students of EU foreign policy, European politics, peace and conflict studies, the Western Balkans, state-building, international organisations, and more broadly to international relations.

Judicial control of public power ensures a guarantee of the rule of law. This book addresses the scope and limits of judicial control at the national level, i.e. the control of public authorities, and at the supranational level, i.e. the control of States. It explores the risk of judicial review leading to judicial activism that can threaten the principle of the separation of powers or the legitimate exercise of state powers. It analyzes how national and supranational legal systems have embodied certain mechanisms, such as the principles of reasonableness, proportionality, deference and margin of

appreciation, as well as the horizontal effects of human rights that help to determine how far a judge can go. Taking a theoretical and comparative view, the book first examines the conceptual bases of the various control systems and then studies the models, structural elements, and functions of the control instruments in selected countries and regions. It uses country and regional reports as the basis for the comparison of the convergences and divergences of the implementation of control in certain countries of Europe, Latin America, and Africa. The book's theoretical reflections and comparative investigations provide answers to important questions, such as whether or not there are nascent universal principles concerning the control of public power, how strong the impact of particular legal traditions is, and to what extent international law concepts have had harmonizing and strengthening effects on internal public-power control.
