Man and the Animal World Springer

First published 30 years ago, Wyatt and Dashwood's European Union Law was a landmark publication, designed and written for students taking degree level courses in EU law. In the intervening years new editions have appeared at regular intervals, firmly establishing the book as a reliable and authoritative text. Besides introducing generations of students to the intricacies of European law it has also been increasingly relied upon by scholars, practitioners and the courts as a valuable source of reference on this complex and ever-expanding body of law. While the book cannot cover every aspect of the subject matter, it nevertheless offers comprehensive coverage of those aspects of EU law most commonly studied at degree level. Part I introduces

the history and foundations of the Union's primary law. Part II looks at the Union's institutions, decision-making procedures and competences. It also deals with the Union judiciary, focusing on direct actions before the Union courts and preliminary references from national courts. The constitutional fundamentals of direct effect and supremacy, effective judicial protection before national courts, general principles of Union law and the Charter of Fundamental Rights are dealt with in Part III. Part IV covers the internal market: free movement of goods, Union citizenship, workers, establishment and services, the services directive, mutual recognition of qualifications, corporate establishment and company law harmonisation. Part V deals with competition law: Articles 101 and 102

TFEU, the enforcement of Union competition rules and other related competition law issues. Part VI then includes a brand new chapter concerned with the EU's external relations, together with treatment of the legal effects of international agreements entered into by the EU. As with previous editions the aim is to provide an accurate, critical, pragmatic and original account of the subject, at times also offering unique insiders' insights. The book holds to its reputation as being both broad and profound, the ideal foundation for gaining a deep understanding of EU law. This edition reflects the law post-Lisbon. It has also been re-structured and re-designed, so as to facilitate ease-of-use. Its original authors, Derrick Wyatt and Alan Dashwood, continue to make a

significant contribution. Michael Dougan, Eleanor Spaventa and Barry Rodger complete the team of authors working on this invaluable textbook and reference work. The 6th edition has already been cited in the Northern Ireland High Court by The Honourable Mr. Justice Bernard McCloskey [2011] NIQB 61.

This volume merges all geographical and paleogeographical data on all groups of the arachnofauna. The book features topics such as the ecological factors, climate and other barriers that influence the distribution of arachnida. It also elaborates on the characteristics of the distribution such as arachnida at high altitude (e.g. Himalaya), in caves, in

polar regions and highlights differences between the arachnofauna of e.g. Mediterranean regions vs Central Europe, West African vs Indomalayan and more. Furthermore, amongst other topics the volume also includes chapters on the systems of arachnida, fossil orders, dispersal and dispersion, endemics and relicts, regional arachnogeography, cave and high altitude arachnida.

The Art of the Mountain Banjo Routledge
This book explores seven centuries of change in Cyprus and the Eastern Mediterranean world through the rise and fall of Famagusta's medieval Armenian Church. An examination of the complex and its art escorts the reader from the era of the Crusades in Lusignan Cyprus, through the rise and fall of the

Venetian, Ottoman and British Empires, to the political stasis of the present day. The Armenian church was a home for displaced villagers during the post-independence era, became a military storage facility post-1974 and eventually fell into abandonment once again. This study represents a pioneering history of the Armenian community in Famagusta and a probing analysis of the art and architecture it left behind. It is also a permanent record of the long-term engagement and commitment of Nanyang Technological University Singapore, the World Monuments Fund, and the Famagusta Municipality to protect this precious site, under extremely challenging circumstances.
Aegean Prehistory Springer
This book explores how school history

textbooks are used to perpetuate nationalistic policies within divided regions. Exploring the 'divide and rule' politics across ex-Yugoslav successor states, the editors and contributors draw upon a wide range of case studies from across the region. Textbooks and other educational media provide the foundations upon which the new generation build understanding about their own context and the events that are creating their present. By promoting nationalistic politics in such media, textbooks themselves can be used as tools to further promote and preserve ongoing hostility between ethnic groups following periods of conflict. This edited collection will appeal to scholars of educational media, history education and post-conflict societies.

Aegean prehistory has developed over the 20th century into a distinctive and vibrant area of archaeological research. The past few decades, in particular, have seen a dramatic reorientation and expansion of goals and methods as well as a flood of new fieldwork in the Aegean. Keeping abreast of these new developments has become a daunting task. *Aegean Prehistory: A Review* contains detailed syntheses of research, originally published in the *American Journal of Archaeology* and newly updated here. The volume conveys the diversity and richness of current approaches to the discipline of Aegean prehistory whilst also marshalling an enormous amount of information

pertaining to field projects, museum studies, analyses of materials and texts, and supporting theories of interpretation. An introduction by Tracey Cullen places the review articles in historical perspective, tracing the evolution of Aegean prehistory from the 19th century to the present. The author also considers the current status of the discipline--its relationships with classical archaeology and anthropology, and the manner in which it is shaped by various sociopolitical forces. *Aegean Prehistory: A Review* is a powerful research tool for the exploration of Aegean themes. With its expansive and detailed coverage, the book constitutes essential reading for professionals and students of Aegean prehistory. It will also be of great interest to all who wish to learn more about

intellectual trends and current discoveries in this part of the Mediterranean. Perhaps most important, *Aegean Prehistory: A Review* provides a solid foundation upon which Aegean archaeology can build as it continues to thrive in the coming years.

Traitors, Collaborators and Deserters in Contemporary European Politics of Memory Mel Bay Publications

This collection examines what happens when one country's experience of dealing with its traumatic past is held up as a model for others to follow. In regional and country studies covering Argentina, Canada, Japan, Lebanon, Rwanda, Russia, Turkey, the United States and former Yugoslavia, the authors look at the pitfalls, misunderstandings and perverse

effects—but also the promise—of trying to replicate atonement. Going beyond the idea of a global or transnational memory, this book examines the significance of foreign models in atonement practices, and analyses the role of national governments, international organisations, museums, foundations, NGOs and public intellectuals in shaping the idea that good practices of atonement can be learned. The volume also demonstrates how one can productively learn from others by appreciating the complex and contested nature of atonement practices such as Germany's, and also by finding the necessary resources in the history of one's own country.

We often think of the Balkans as a region beset by turmoil and backwardness, but from late antiquity to the present it has been a dynamic meeting place of cultures and religions. Marie-Janine Calic invites us to reconsider the history of this intriguing, diverse region as essential to the story of global Europe.

The Great Cauldron Springer

This book explores the historical role of the Balkan Wars. In Eastern Europe, the two Balkan Wars of 1912/13 had greater importance than the First World War for the construction of nations and states. This volume shows how these “short” wars profoundly changed the sociopolitical situation in the Balkans, with consequences that are still felt today. More than one hundred years

later, the successors of the belligerent states in Southeastern Europe memorialize the wars as heroic highlights of their respective pasts. Furthermore, the metaphor that the Balkans were Europe's "powder keg", perpetuated at the beginning of the twentieth century in the face of these wars, was reactivated in both the West and the East up through the Yugoslav wars of the 1990s. The authors entangle the hitherto exclusive national master narratives and analyse them cogently and trenchantly for an international readership. They make an indispensable contribution to the proper integration of the Balkan Wars into the European historical memory of twentieth-century warfare.

This book reviews the unique ecosystem of the Lake Skadar/Shkodra and its basin, and discusses the latest advances made in this region to face the impact of climate change. Divided into 23 chapters, the book gathers leading expertise from various scientific and engineering communities and provides readers with extensive discussions of core issues, including the water and sediment chemistry of Lake Skadar/Shkodra and the metal pollution that is evident in plants, aquatic invertebrates and fish. Readers will discover how a sustainable science-based management approach can be applied to the Lake Skadar/Shkodra region, and will learn about the environment prospects for the region.

This book is intended as an essential tool for all scientists interested in the Lake Skadar/Shkodra environment – in particular those investigating the interactions between land and water, between limnology and biota, and between natural and cultural resources.

In *Intent for a Nation*, Michael Byers argues that it is time for a clear-eyed appreciation of our strengths and weaknesses, of all we have and all we could be. A whole series of world events—the waning of US credibility; the

increasing value of natural resources; the brain-gain; the ever-increasing interdependence of peoples, countries and continents—have combined to put Canada center stage in a new world order. Instead of emulating our increasingly isolated neighbor, we should be advancing the Canadian model, an idealistic, fiscally prudent, socially progressive vision that has never looked so good. *Intent for a Nation* is a fundamentally optimistic, informed and opinionated overview of where Canada stands in the world and what aggressive public policies are needed to carry the country forward in an ever more competitive and volatile world. Here is a book urging Canadians to rediscover their national self-confidence, to find the courage to dream great dreams—and

make them happen.

One quirk of fate can send life spiralling in the most unexpected direction... A young girl loses her mother when a block of ice falls from the sky. A woman wins the jackpot twice. A man is struck by lightning four times. Coincidence? Or something more? *Things That Fall from*

the Sky is the tale of three lives that are changed forever by random events. But it is also a meditation on the endurance of love, the passage of time and the pain of loss. Selja Ahava, one of Finland's best-loved novelists, weaves these stories together in an unforgettable, one-of-a-kind fable about the twists and turns that can define a lifetime.

Why did Yugoslavia fall apart? Was its violent demise inevitable? Did its population simply fall victim to the lure of nationalism? How did this multinational state survive for so long, and where do we situate the short life of Yugoslavia in the long history of Europe in the twentieth century? A History of

Yugoslavia provides a concise, accessible, comprehensive synthesis of the political, cultural, social, and economic life of Yugoslavia—from its nineteenth-century South Slavic origins to the bloody demise of the multinational state of Yugoslavia in the 1990s. Calic takes a fresh and innovative look at the colorful, multifaceted, and complex history of Yugoslavia, emphasizing major social, economic, and intellectual changes from the turn of the twentieth century and the transition to modern industrialized mass society. She traces the origins of ethnic, religious, and cultural divisions, applying the latest social science approaches, and drawing on the breadth of recent state-of-the-art literature, to present a balanced interpretation of events that takes into

account the differing perceptions and interests of the actors involved. Uniquely, Calic frames the history of Yugoslavia for readers as an essentially open-ended process, undertaken from a variety of different regional perspectives with varied composite agenda. She shuns traditional, deterministic explanations that notorious Balkan hatreds or any other kind of exceptionalism are to blame for Yugoslavia's demise, and along the way she highlights the agency of twentieth-century modern mass society in the politicization of differences. While analyzing nuanced political and social-economic processes, Calic describes the experiences and emotions of ordinary people in a vivid way. As a result, her groundbreaking work provides scholars

and learned readers alike with an accessible, trenchant, and authoritative introduction to Yugoslavia's complex history.

Embryology and Phylogeny in Annelids and Arthropods Springer

This book presents a selection of the newest research on themes amplified by the sixth annual Beyond Camps and Forced Labour conference on the post-Holocaust period, including 'displaced persons', reception and resettlement, exiles and refugees, trials and justice, reparation and restitution, and memory and testimony. The chapters highlight new, transnational approaches and findings based on underused and newly opened archives, including compensation files of the British government; on historical actors often

on the periphery within English-language historiography, including Romanian and Hungarian survivors; and new approaches such as the spatial history of Drancy, as well as geographies that have undergone less scrutiny, for example, Tehran, Chile, Mexico and Cyprus. This volume represents the vibrant and varied state of research on the aftermath of the Holocaust.

Embryology and Phylogeny in Annelids and Arthropods describes the embryology of segmented invertebrates, utilizing morphological facts of embryonic development in the furtherance of speculations on phylogenetic relationships. This book begins with an introduction to embryology and phylogeny, followed by a discussion on the experimental embryology of animals groups, such as polychaetes, oligochaetes and leeches,

onychophorans, myriapods, apterygote and pterygote insects, crustaceans, and chelicerates. The cleavage, gastrulation, and basic pattern of development of these invertebrates are also provided. This text concludes with a presentation of the onychophoran-myriapod-hexapod assemblage or Uniramia. This publication is recommended for experimental embryologists researching on the embryonic development in annelids and arthropods.

Nationhood and Politicization of History in School Textbooks D & M Publishers

A highly topical examination of the effect of European integration on relations between states and minority nations. This new collection brings together the leading specialists in the field, and covers a wide range of cases, from

Northern Ireland in the West, to Estonia and Latvia in the East, and Cyprus in the South-East. The contributors assess how European integration has affected the preparedness of states to accommodate minorities across a range of fundamental criteria, including: enhanced rights protection; autonomy; the provision of a voice for minorities in the European and international arena; and the promotion of cross-border cooperation among communities dissected by state frontiers. The comprehensive chapters stress the importance of the nationality question, and the fact that, contrary to the hopes and beliefs of many on the left and right, it is not going to go away. Beginning with an introductory essay that summarizes the impact of European integration on the nationalities question,

this accessible book will be of strong
interest to scholars and researchers of

politics, nationalism, ethnic conflict and
European studies.
