Excerpt from *Selling With Color* This is a book about color and people. It has been written to be of practical benefit to modern business, to assure the effective development of consumer products, merchandising, advertising, packages, displays. Most books on color will be found long on theory and short on practice. This, perhaps, is because color is emotional in its appeal and tends to inspire a personal and subjective viewpoint. Yet while the so-called artistic aspects of color may be elusive, the facts of mass human reaction are otherwise. For color in industry today may be "engineered" with remarkable certainty, once the methods are known and applied with intelligence and care. It is evident that when you pick the right colors you sell a lot of merchandise or influence a lot of people; when you pick the wrong colors you pile up unsold inventories and see the public

turn its back. To management this means that color problems must be rightly analyzed and estimated, that customers and markets must be known. To those charged with the details of styling, the creative "hunch" must be supported by a real understanding of human wants and desires. It is the intent of this book to present facts rather than opinions and to set forth principles that have the support of extensive research and sales record. To accomplish this it has been necessary to gather all possible data from the scientific investigator and to study the sales experience of numerous industries. With such evidence at hand the more temperamental aspects of color may be thrown into clearer light and a better and surer control realized. www.sagepub.com/freetrial The study of curriculum, beginning in the early 20th century, first served the areas of school administration and teaching and was used to design and develop

programs of study. The field subsequently expanded and drew upon disciplines from the arts, humanities, and social sciences to examine larger educational forces and their effects upon the individual, society, and conceptions of knowledge. Curriculum studies now embraces an array of academic scholarship in relation to personal and institutional needs and interests while it also focuses upon a diverse and complex dynamic among educational experiences, practices, settings, actions, and theories. The Encyclopedia of Curriculum Studies provides a comprehensive introduction to the academic field of curriculum studies for the scholar, student, teacher, and administrator. This two-volume set serves to inform and to introduce terms, events, documents, biographies, and concepts to assist the reader in understanding aspects of this rapidly changing, expansive, and contested field of study. FINANCIAL ACCOUNTING (FA) - Study Text Satzweiss.com

From the dawn of time, ruby and sapphire have both attracted and fascinated humans in ways that few other items could. While objects of desire are found throughout the natural world, physical beauty is too often ephemeral. From the allure of a man, woman, flower or butterfly, through the fleeting moments of a sunset, there is little that lasts and practically nothing that can be passed down to our descendants. The exception is precious stones. Not only are they the most durable creations of mother nature, but their visual splendor is truly eternal. In this companion to his 2013 book, *Ruby & Sapphire--A Collector's Guide*, Richard Hughes examines these gems from the gemological standpoint, delving into these gems not just from the aesthetic, but also from the scientific point of view. The product of nearly 40 years of firsthand experience, it covers every aspect of the subject from A-Z. History, sources, prices, quality analysis, synthetics and treatments, everything is here. *Ruby & Sapphire--A Gemologist's Guide* represents the most comprehensive book ever written on a single precious stone. With over 1000 photos, maps and

illustrations and 3500 references, it is nothing less than a tour-de-force of gemological scholarship.

A new Council of Europe reference framework of competences for democratic culture! Contemporary societies within Europe face many challenges, including declining levels of voter turnout in elections, increased distrust of politicians, high levels of hate crime, intolerance and prejudice towards minority ethnic and religious groups, and increasing levels of support for violent extremism. These challenges threaten the legitimacy of democratic institutions and peaceful co-existence within Europe. Formal education is a vital tool that can be used to tackle these challenges. Appropriate educational input and practices can boost democratic engagement, reduce intolerance and prejudice, and decrease support for violent extremism. However, to achieve these goals, educationists need a clear understanding of the democratic competences that should be targeted by the curriculum. This book presents a new conceptual model of the competences which citizens require to participate in democratic culture and live peacefully together with others in culturally diverse societies. The model is the product of intensive work over a two-year period, and has been strongly endorsed in an international consultation with leading educational experts. The book describes the competence model in detail, together with the methods used to develop it. The model provides a robust conceptual foundation for the future development of curricula, pedagogies and assessments in democratic citizenship and human rights education. Its application will enable educational systems to be harnessed effectively for the preparation of

students for life as engaged and tolerant democratic citizens. The book forms the first component of a new Council of Europe reference framework of competences for democratic culture. It is vital reading for all educational policy makers and practitioners who work in the fields of education for democratic citizenship, human rights education and intercultural education.
