Six-time New York Times bestselling author, FOX

News star, and radio host Mark R. Levin “trounces the news media” (The Washington Times) in this timely and groundbreaking book demonstrating how the great tradition of American free press has degenerated into a standardless profession that has squandered the faith and trust of the public. Unfreedom of the Press is not just another book about the press. In “Levin’s finest work” (Breitbart), he shows how those entrusted with news reporting today are destroying freedom of the press from within—not through actions of

government officials, but with its own abandonment of reportorial integrity and objective journalism. With the depth of historical background for which his books are renowned, Levin takes you on a journey through the early American patriot press, which proudly promoted the principles set forth in the Declaration of Independence and the Constitution. This is followed by the early decades of the Republic during which newspapers around the young country were open and transparent about their fierce allegiance to one political party or another.

It was only at the start of the Progressive Era and the 20th century that the supposed “objectivity of the press” first surfaced, leaving us where we are today: with a partisan party-press overwhelmingly aligned with a political ideology but hypocritically engaged in a massive untruth as to its real nature.

Considered by many to be a founder of Afrofuturism, Sun Ra—aka Herman Blount—was a composer, keyboardist, bandleader, philosopher, entrepreneur, poet, and self-proclaimed extraterrestrial from Saturn. He recorded over 200 albums with his Arkestra, which, dressed in Egypto-space costumes, played everything from boogie-woogie and swing to fusion and free jazz. John Szwed's *Space is the Place* is the definitive biography of this musical

polymath, who was one of the twentieth century's greatest avant-garde artists and intellectuals. Charting the whole of Sun Ra's life and career, Szwed outlines how after years in Chicago as a blues and swing band pianist, Sun Ra set out in the 1950s to impart his views about the galaxy, black people, and spiritual matters by performing music with the Arkestra that was as vital and innovative as it was mercurial and confounding. Szwed's readers—whether they are just discovering Sun Ra or are among the legion of poets, artists, intellectuals, and musicians who consider him a spiritual godfather—will find that, indeed, space is the place.

Dogma 95, the avant-garde filmmaking movement founded by the Danish director Lars von Trier and three of his fellow directors, was launched in 1995 at an elite cinema conference in Paris—when von Trier was called upon to speak about the future of film but instead showered the audience with pamphlets announcing the new movement and its manifesto. A refreshingly original critical commentary on the director and his practice, *Playing the Waves* is a paramount addition to one of new media's most provocative genres: games and gaming. *Playing the Waves* cleverly puns on the title

of one of von Trier's most famous features and argues that *Dogma 95*, like much of the director's low-budget realist productions, is a game that takes cinema beyond the traditional confines of film aesthetics and dramatic rules. Simons articulates the ways in which von Trier redefines the practice of filmmaking as a rule-bound activity, and stipulates the forms and structures of games von Trier brings to bear on his films, as well as the sobering lessons he draws from economic and evolutionary game theory. Much like the director's films, this fascinating volume takes the traditional point of view of film theory and film aesthetics to the next level and demonstrates we have much to learn from the perspective of game studies and game theory.

In this new book, Bauman examines how we have moved away from a 'heavy' and 'solid', hardware-focused modernity to a 'light' and 'liquid', software-based modernity. This passage, he argues, has brought profound change to all aspects of the human

condition. The new remoteness and unreachability of global systemic structure coupled with the unstructured and under-defined, fluid state of the immediate setting of life-politics and human togetherness, call for the rethinking of the concepts and cognitive frames used to narrate human individual experience and their joint history. This book is dedicated to this task. Bauman selects five of the basic concepts which have served to make sense of shared human life - emancipation, individuality, time/space, work and community - and traces their successive incarnations and changes of meaning. *Liquid Modernity* concludes the analysis undertaken in Bauman's two previous books *Globalization: The Human Consequences* and *In Search of Politics*. Together these volumes form a brilliant analysis of the changing conditions of social and political life by one of the most original thinkers writing today. *The International English and French Dictionary* John Wiley & Sons The first major literary presentation of Nostradamus's

Prophecies, newly translated and edited by prizewinning scholars The mysterious quatrains of the sixteenth-century French astrologer Nostradamus have long proved captivating for their predictions. Nostradamus has been credited with anticipating the Great Fire of London, the rise of Adolf Hitler, and the September 11 terrorist attacks. Today, as the world grapples with financial meltdowns, global terrorism, and environmental disasters—as well as the Mayan prediction of the apocalypse on December 21, 2012—his prophecies of doom have assumed heightened relevance. How has *The Prophecies* outlasted most books from the Renaissance? This edition considers its legacy in terms of the poetics of the quatrains, published here in a brilliant new translation and with introductory material and notes mapping the cultural, political, and historical forces that resonate throughout Nostradamus's epic, giving it its visionary power. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-

When conventional medicine fails, reservations about alternative healing methods disappear. This factor led to the young Armenian-Persian faith healer Avak Hakobian being invited to the USA in 1947. His mission: to heal a paralyzed

Californian millionaire's son. Then as now, charismatic healers benefit from the assumption that they have access to a mystical source or transcendent energy. Not a few people entrust such supposed healers with their physical as well as their spiritual well-being. "Avak Hakobian - From Fame to Failure" is the previously untold story of one such healer who for a time made headline news. [The International English and French Dictionary](#) Springer

Are you a witless cretin with no reason to live? Would you like to know more about every piece of knowledge ever? Do you have cash? Then congratulations, because just in time for the death of the print industry as we know it comes the final book ever published, and the only one you will ever need: *The Onion's compendium of all things known*. Replete with an astonishing assemblage of facts, illustrations, maps, charts, threats, blood, and additional fees to edify even the most simple-minded book-buyer, *THE ONION BOOK OF KNOWN KNOWLEDGE* is packed with valuable information—such as the life stages of an Aunt;

places to kill one's self in Utica, New York; and the dimensions of a female bucket, or "pail." With hundreds of entries for all 27 letters of the alphabet, *THE ONION BOOK OF KNOWN KNOWLEDGE* must be purchased immediately to avoid the sting of eternal ignorance. *CISSP For Dummies* Routledge

Japanese "new religions" (*shinshūkyō*) have used various media forms for training, communicating with members, presenting their messages, reinforcing or protecting the image of the leader, and, potentially, attracting converts. In this book the complex and dual relationship between media and new religions is investigated by looking at the tensions groups face between the need for visibility and the risks of facing attacks and criticism through media. Indeed media and new technologies have been extensively used by religious groups not only to spread their messages

and to try to reach a wider audience, but also to promote themselves as a highly modern and up-to-date form of religion appropriate for a modern technological age. In the 1980s and early 1990s some movements, such as Agonshū, Kōfuku no Kagaku, and Aum Shinrikyō came into prominence especially via the use of media (initially publications, but also ritual broadcasts, advertising campaigns, and public media events). This created new modes of ritual engagement and new ways of interactions between leaders and members. The aim of this book is to develop and illustrate particular key issues in the wider new religions and media nexus by using specific movements as examples. In particular, the analysis of the interaction between media and new religions will focus primarily on three case studies predominantly during the first period of development of the groups.

Thomas Gilovich offers a wise and readable guide to the fallacy of the obvious in everyday life. When can we trust what we believe—that "teams

and players have winning streaks," that "flattery works," or that "the more people who agree, the more likely they are to be right"—and when are such beliefs suspect? Thomas Gilovich offers a guide to the fallacy of the obvious in everyday life.

Illustrating his points with examples, and supporting them with the latest research findings, he documents the cognitive, social, and motivational processes that distort our thoughts, beliefs, judgments and decisions. In a rapidly changing world, the biases and stereotypes that help us process an overload of complex information inevitably distort what we would like to believe is reality. Awareness of our propensity to make these systematic errors, Gilovich argues, is the first step to more effective analysis and action.

Liquid Modernity

The prediction of behavior of complex systems, analysis and modeling of its structure is a vitally

important problem in engineering, economy and generally in science today. Examples of such systems can be seen in the world around us (including our bodies) and of course in almost every scientific discipline including such "exotic" domains as the earth's atmosphere, turbulent fluids, economics (exchange rate and stock markets), population growth, physics (control of plasma), information flow in social networks and its dynamics, chemistry and complex networks. To understand such complex dynamics, which often exhibit strange behavior, and to use it in research or industrial applications, it is paramount to create its models. For this purpose there exists a rich spectrum of methods, from classical such as ARMA models or Box Jenkins method to modern ones like evolutionary computation, neural networks, fuzzy logic, geometry, deterministic chaos amongst others. This proceedings book is a

collection of accepted papers of the Nostradamus conference that has been held in Ostrava, Czech Republic in June 2014. This book also includes outstanding keynote lectures by distinguished guest speakers: René Lozi (France), Ponnuthurai Nagaratnam Suganthan (Singapore) and Lars Nolle (Germany). The main aim of the conference was to create a periodical possibility for students, academics and researchers to exchange their ideas and novel research methods. This conference establishes a forum for presentation and discussion of recent research trends in the area of applications of various predictive methods.
