Dare to Lead

Teachers & Writers Collaborative
An indispensable resource for students and scholars, The Oxford Handbook of the Psalms features a diverse array of essays that treat the Psalms from a variety of perspectives. Classical

scholarship and approaches as well as contextual interpretations and practices are well represented. The coverage is uniquely wide ranging.

Choice Houghton Mifflin Harcourt

Deathworlds are places on planet earth that can no longer sustain life. These are increasing rapidly. We experience remnants of Deathworlds within our Lifeworlds (for example traumatic echoes of war, genocide, oppression). Many practices and policies, directly or indirectly, are "Deathworld-Making." They undermine Lifeworlds contributing to community decline, illnesses, climate change, and species extinction. This book highlights the ways in

which writing about and sharing meaningful experiences may lead to social and environmental justice practices, decreasing Deathworld-Making. Phenomenology is a method which reveals the connection between personal suffering and the suffering of the planet earth and all its creatures. Sharing can lead to collaborative relationships among strangers for social and environmental justice across barriers of culture, politics, and language.

"Deathworlds into Lifeworlds wakes people up to how current economic and social forces are destroying life and communities on our planet, as I have mapped in my work. The chapters by

scholars around the world in this powerful book testify to the pervasive consequences of the proliferation of Deathworld-making and ways that collaboration across cultures can help move us forward." —Saskia Sassen is the Robert S. Lynd Professor of Sociology at Columbia University and a Member of its Committee on Global Thought. "Recognizing the inseparability of experience, consciousness, environment and problematics in rebalancing life systems, this book offers solutions from around the world."

—Four Arrows, aka Don Trent Jacobs, author of *Sitting Bull's Words for A World in Crises*, et al. "This unique book

brings together 78 participants from 11 countries to reveal the ways in which phenomenology – the study of consciousness and phenomena — can lead to profound personal and social transformation. Such transformation is especially powerful when "Deathworlds" – physical or cultural places that no longer sustain life – are transformed into "lifeworlds" through collaborative sharing, even when (or, perhaps, especially when) the sharing is among strangers across different cultures. The contributors share a truly wide range of human experiences, from the death of a child to ecological destruction, in offering ways to affirm life in

the face of what may seem to be hopeless death-affirming challenges." —Richard P. Appelbaum, Ph.D., is Distinguished Research Professor Emeritus and former MacArthur Foundation Chair in Global and International Studies and Sociology at the University of California, Santa Barbara. He is also a founding Professor at Fielding Graduate University, where he heads the doctoral concentration in Sustainability Leadership. "Deathworlds is a love letter for the planet—our home. By documenting places that no longer sustain life, the authors collectively pull back the curtain on these places, rendering them meaningful by connecting what ails us

with what ails the world." —Katrina S. Rogers, Ph.D., conservation activist and author "Deathworlds to Lifeworlds represents collaboration among Fielding Graduate University, the University of Łódź (Poland), and the University of the Virgin Islands. Students and faculty from these universities participated in seminars on transformative phenomenology and developed rich phenomenologically based narratives of their experiences or others'. These phenomenological protocol narratives creatively modify and integrate with everyday experience the conceptual frameworks of Husserl,

Schutz, Heidegger, Habermas, and others. The diverse protocol authors demonstrate how phenomenological reflection is transformative first by revealing how Deathworlds, which lead to physical, mental, social, or ecological decline, imperil invaluable lifeworlds. Deathworlds appear on lifeworld fringes, such as extra-urban trash landfills, where unnoticed impoverished workers labor to the destruction of their own health. Poignant protocol-narratives highlight the plight and noble struggle of homeless people, the mother of a dying 19-year-old son, persons inclined to suicide, overwhelmed first responders, alcoholics who through inspiration achieve

sobriety, unravelled We-Relationships, those suffering from and overcoming addiction or misogynist stereotypes or excessive pressures, veterans distraught after combat, a military mother, those in liminal situations, and oppressed indigenous peoples who still make available their liberating spirituality. Transformative phenomenology exemplifies that generous responsiveness to the ethical summons to solidarity to which Levinas's Other invites us." —Michael Barber, Ph.D., Professor of Philosophy, St. Louis University. He has authored seven books and more than 80 articles in the general area of phenomenology and

the social world. He is editor of *Schützian Research*, an annual interdisciplinary journal. "This book helps us notice the Deathworlds that surround us and advocates for their de-naturalization. Its central claim is that the ten virtues of the transformative phenomenologist allow us to do so by changing ourselves and the worlds we live in. In this light, the book is an outstanding presentation of the international movement known as "transformative phenomenology." It makes groundbreaking contributions to a tradition in which some of the authors are considered the main referents. Also, it offers an innovative understanding of Alfred

Schutz's philosophy of the Lifeworld and a fruitful application of Van Manen's method of written protocols." —Carlos Belvedere, Ph.D., Professor, Faculty of Social Sciences, University of Buenos Aires" "Moving beyond the social phenomenology carved out by Alfred Schütz, this impressive volume of action-based experiential research displays the efficacy of applying phenomenological protocols to explore Deathworlds, the tacit side of the foundational conception of Lifeworlds. Over twenty-one chapters, plus an epilogue, readers are transported by the train of Transformative Phenomenology, created during what's

been called the Silver Age of Phenomenology (1996 – present) at the Fielding Graduate University. An international amalgam of students and faculty from universities in Poland, the United States, the Virgin Islands, Canada, and socio-cultural locations throughout the world harnessed their collective energy to advance the practical call of phenomenology as a pathway to meaning-making through rich descriptions of lived experience. Topics include dwelling with strangers, dealing with trash, walking with the homeless, death of a young person, overcoming colonialism, precognition, environmental destruction, and so

much more. The research collection enhances what counts as phenomenological inquiry, while remaining respectful of Edmund Husserl's philosophical roots."

—David Rehorick, PhD, Professor Emeritus of Sociology, University of New Brunswick (Canada) & Professor Emeritus, Fielding Graduate University (U.S.A.), Vancouver, British Columbia.

Can poetry act as an aesthetic amplification device, akin to a microscope, through which we can sense minute or nearly imperceptible phenomena such as the folding of molecules into their three-dimensional shapes, the

transformations that make up the life cycle of a silkworm, or the vaporous movements that constitute the ever-shifting edges of clouds? We tend to think of these subjects as reserved for science, but, as Ada Smailbegović argues, twentieth- and twenty-first-century writers have intermingled scientific methodologies with poetic form to reveal unfolding processes of change. Their works can be envisioned as laboratories within which the methodologies of experimentation, natural historical description, and taxonomic classification allow poetic language to register the rhythms and durations of material

transformation. Poetics of Liveliness moves across scales to explore the realms of molecules, fibers, tissues, and clouds. It investigates works such as Christian Bök's insertion of a poetic text into the DNA code of living bacteria in order to generate a new poem in the shape of a protein molecule, Jen Bervin's considerations of silk fibers and their use in biomedicine, Gertrude Stein's examination of brain tissues in medical school and its subsequent influence on her literary taxonomies of character, and Lisa Robertson's studies of nineteenth-century meteorology and the soft architecture of clouds. In their attempt to understand physical processes unfolding

within lively material worlds, Smailbegović contends, these poets have developed a distinctive materialist poetics. Structured as a poetic cosmology akin to Lucretius's "On the Nature of Things," which begins at the atomic level and expands out to the vastness of the universe, Poetics of Liveliness provides an innovative and surprising vision of the relationship between science and poetry. [Improving K-12 STEM Education Outcomes through Technological Integration](#) BRILL Enormous ecological losses and profound planetary transformations mean that ours is a time to grieve beyond the human. Yet, Joshua Trey Barnett argues in this eloquent and

urgent book, our capacity to grieve for more-than-human others is neither natural nor inevitable. Weaving together personal narratives, theoretical meditations, and insightful readings of cultural artifacts, he suggests that ecological grief is best understood as a rhetorical achievement. As a collection of worldmaking practices, rhetoric makes things matter, bestows value, directs attention, generates knowledge, and foments feelings. By dwelling on three rhetorical practices—naming, archiving, and making visible—Barnett shows how they prepare us to grieve past, present, and future ecological losses. Simultaneously

diagnostic and prescriptive, this book reveals rhetorical practices that set our ecological grief into motion and illuminates pathways to more connected, caring earthly coexistence.

The poetry and prose collected in *Plainwater* are a testament to the extraordinary imagination of Anne Carson, a writer described by Michael Ondaatje as "the most exciting poet writing in English today."

Succinct and astonishingly beautiful, these pieces stretch the boundaries of language and literary form, while juxtaposing classical and modern traditions. Carson envisions a present-day interview with a seventh-century BC

poet, and offers miniature lectures on topics as varied as orchids and Ovid. She imagines the muse of a fifteenth-century painter attending a phenomenology conference in Italy. She constructs verbal photographs of a series of mysterious towns, and takes us on a pilgrimage in pursuit of the elusive and intimate anthropology of water. Blending the rhythm and vivid metaphor of poetry with the discursive nature of the essay, the writings in Plainwater dazzle us with their invention and enlighten us with their erudition.

By employing the modernist devices of fragmentation, recombination, and accentuated blank space, E. E. Cummings engages singularly with being on earth. This ecological achievement was largely ignored by the New Critics, and the subsequent semiotic spirit which has been holding that the sign hardly has to do with concrete existence on earth ironically perpetuated the neglect. In this book Etienne Terblanche shows that Cummings's ecology relocates his oeuvre and status in contemporary discourse. For, the poet follows, mimes, and

connects with the unfolding changes of earthly existence and growth—what he views as the ‘Tao’ of being—in his lyricism, sex poems, satire, and visual-verbal poems. This is true especially of the elusive manner or ‘how’ of his poetry overall. Careful ecocritical reading of this active culture-nature integrity in his poetry brings about an imperative new understanding and placement of his project. It further serves to show that, in their different ways, T. S. Eliot and Ezra Pound engage with nature in a similar way, thus again accentuating the importance of Cummings’s poetic project to the neglected and vital ecocritical perception of modernism in

poetry.

 Interactions in Ecology
 and Literature
 integrates ecology with
 the concept of
 interactions and the
 reading of fictional and
 informational texts.
 This unit, developed by
 Vanderbilt University's
 Programs for Talented
 Youth, is aligned to the
 Common Core State
 Standards for English
 Language Arts and
 Next Generation
 Science Standards.
 Students will research
 questions such as
 "Should animals be
 kept in zoos?" and
 "Should humans
 intervene to control
 overpopulation of
 species?" They will
 examine relationships
 among living things

and the environment as well as relationships between literary elements in texts through accelerated content, engaging activities, and differentiated tasks. Ideal for gifted classrooms or gifted pull-out groups, the unit features fictional texts from Lynne Cherry, Katherine Applegate, and Jacqueline Woodson; art from Mark Rothko and Georges Seurat; informational texts about deforestation and a variety of animals; biographies about Michael Jordan, J. K. Rowling, and Walt Disney; and videos about food chains, food webs, and more.

Testament and
Apocrypha and
Fortress Commentary
on the Bible: The New
Testament present a
balanced synthesis of
current scholarship on
the Bible, enabling
readers to interpret
Scripture for a complex
and pluralistic world.
Introductory articles in
each volume discuss
the dramatic
challenges that have
shaped contemporary
interpretation of the
Bible. Commentary
articles set each book
of the Old and New
Testaments and the
Apocrypha in its
historical and cultural
context, discuss the
themes in each book
that have proven most
important for the
Christian interpretive

tradition, and introduce
the most pressing
questions facing the
responsible use of the
Bible today. The
writers are renowned
authorities in the
historical interpretation
of the Old and New
Testaments, sensitive
to theological and
cultural issues arising
in our encounter with
the text, richly diverse
in social locations and
vantage points,
representing a broad
array of theological
commitment—Protestants,
Catholics, Jews,
and others, and alive
to the ethical
consequences of
interpretation today. A
team of six scholar
editors and seventy
contributors provide
clear and concise
commentary on key
sense units in each
book of the Old
Testament, Apocrypha,

and New Testament. Each unit is explored through the lenses of three levels of commentary based on these critical questions. The result is a commentary that is comprehensive and useful for gaining insights on the texts for preaching, teaching, and research. In addition to the commentary essays on each book, the volumes also contain major essays that introduce each section of Scripture and explore critical questions as well as up-to-date and comprehensive bibliographies for each book and essay.

[Middlebury College Newsletter Coach House Books](#)
On the Authorship Controversy is about how a historical

deception has survived as a tradition for nearly 400 years, despite numerous challenges. I am referring to the "tradition" that the works attributed to William Shakespeare of Stratford-on-Avon were actually written by him, despite no evidence of schooling or access to libraries, lack of recognition by other playwrights when he died, and much more. The editors of the definitive decennial edition of his works, together with virtually all other scholars of English Literature, have declared that this rural fellow is the true author. This book offers irrefutable mathematical evidence that Christopher Marlowe -- graduate of Cambridge University, the inventor of iambic pentameter, and the

author of seven important plays before “Shakespeare” had ever been heard of -- did not die in late May 1593, as officially reported by the Queen’s Coroner. How do we know that Marlowe was alive and the author of the sonnets? He announced his authorship in ciphers that are clear and unmistakable once you find the key. The key was found by an independent scholar named Peter Bull in 2005. He self-published his findings because the mainstream publishers were not interested, and very few people bothered to read his work. I did, and I have now undertaken to make his discovery a little more accessible to the general reader.

ecosystems Random House

“What does this poem mean?” “How should I read it?” “How do we talk about it?” “What do I DO with it?”

“What’s the best way to assess it?” “How do I meet standards?”

“When can I possibly fit it into my already over-packed day?” Have you ever asked these questions about poetry? The 30 Painless Classroom Poems series makes it easy for you, the elementary school teacher, media specialist, or reading specialist, to share poetry with your students. Whether you already love poetry or you fear or even actively dislike it, these

books are for you. The poems, Notes from the Poet, extension activities written by experienced classroom teachers, and tips for using poetry in your classroom will have you sharing poems in no time. In Wacky, Wild, and Wonderful: 50 State Poems, award-winning poet Laura Purdie Salas (author of BookSpeak!, Water Can Be..., and more) offers up a poem for every state, covering a wide variety of poetic forms, moods, and topics. Extension activities by teacher Catherine Flynn share ideas for spring-boarding from these poems into deeper learning across many content areas. Sample: Pennsylvania: Celebrity Weatherman Phil has no thermometers And no advanced degrees

He only knows a cold front By its snapping, chapping breeze He can't interpret radar He's surprised by winter snows But Phil foretells the birth of spring Because his shadow knows ? Note: Every year since 1877, on February 2, a groundhog--who is always named Punxsutawney Phil--comes out of his hole in Punxsutawney, Pennsylvania. If he sees his shadow, tradition says, that means six more weeks of winter. If he does not see his shadow, that means winter is over. Thousands of people go to Gobbler's Knob, a hill outside the town center, each year to see Phil's Prognostication, and reporters around the country spread word of the results. A Note

from the Poet: As high-tech as we are, we still love our traditions and superstitions. I love that every February 2nd, on Groundhog's Day, newspapers and news shows still report on whether Phil sees his shadow or not. Up here in Minnesota, we ignore Phil's prediction because there's no chance winter is going to end before mid-March! See all of the 30 Painless Classroom Poems at www.30PainlessClassroomPoems.com. Disclaimer: For those of you collecting all my 30 Painless Classroom Poems books, please note that some information, such as Why Poetry Matters and Classroom Poetry Tips, is repeated from book to book. The introduction to the book, the poems, the

Notes from the Poet, and the classroom activities are unique to each book.

 "Many artists seek to
 attain immortality
 through their art, but
 few would expect their
 work to outlast the
 human race and live on
 for billions of years. As
 Canadian poet
 Christian Bök has
 realized, it all comes
 down to the durability
 of your
 materials."—The
 Guardian
 Internationally best-
 selling poet Christian
 Bök has spent more
 than ten years writing
 what promises to be
 the first example of

"living poetry." After successfully demonstrating his concept in a colony of *E. coli*, Bök is on the verge of enciphering a beautiful, anomalous poem into the genome of an unkillable bacterium (*Deinococcus radiodurans*), which can, in turn, "read" his text, responding to it by manufacturing a viable, benign protein, whose sequence of amino acids enciphers yet another poem. The engineered organism might conceivably serve as a post-apocalyptic archive, capable of outlasting our civilization. Book I of *The Xenotext* constitutes a kind of "demonic grimoire," providing a scientific framework for the project with a series of poems, texts, and

illustrations. A Virgilian welcome to the *Inferno*, Book I is the "orphic" volume in a diptych, addressing the pastoral heritage of poets, who have sought to supplant nature in both beauty and terror. The book sets the conceptual groundwork for the second volume, which will document the experiment itself. *The Xenotext* is experimental poetry in the truest sense of the term. Christian Bök is the author of *Crystallography* (1994) and *Eunoia* (2001), which won the Griffin Poetry Prize. He teaches at the University of Calgary in Alberta, Canada. Winner of the Colorado Book Award in Poetry

(2018) In this fourth book in a series of award-winning survival narratives, Dungy writes positioned at a fulcrum, bringing a new life into the world even as her elders are passing on. In a time of massive environmental degradation, violence and abuse of power, a world in which we all must survive, these poems resonate within and beyond the scope of the human realms, delicately balancing

between conflicting loci of attention. Dwelling between vibrancy and its opposite, Dungy writes in a single poem about a mother, a daughter, Smokin' Joe Frazier, brittle stars, giant boulders, and a dead blue whale. These poems are written in the face of despair to hold an impossible love and a commitment to hope. A readers companion will be available at wesleyan.edu/wespress/readerscompanions.
