Wanting to create a favorable impression with others is a basic part of human nature in both work and personal life. In this book, Andrew J. DuBrin skillfully provides a guide to the effective use of impression

management based on scholarly research and theory, with particular attention to practical application. He highlights not only impressions that individuals make, but those made by entire organizations. Self-tests and questionnaires allow readers to pinpoint how they currently employ impression management techniques in their work lives. Each chapter includes a section on "Guidelines for Application and Skill Development" that provides real-world advice based on the theories and research outlined in the chapter. With this book, students will glean the best methods for creating positive, career-building impressions in current

and future positions.

Introduction to Forensic Sciences, Second Edition is the current edition of this bestselling introductory textbook. Dr. William Eckert, one of the world's foremost authorities in the area of forensic medicine, presents each of the distinct fields that collectively comprise the forensic sciences in a logical, relatively non-technical fashion. Each chapter is written

by a well-known expert in his/her respective field, and each speciality area is thoroughly treated. When appropriate, the various methods of applying these sciences in different countries are covered. Heavily illustrated, the Second Edition has been updated to include current procedures and techniques that were not available or usefully developed when the first edition was published. Features include: Text Into Image, Image Into Text CRC Press Drawing on The Medic Portal's established track record, the third edition of this popular revision aid, retitled Mastering the UCAT to reflect the extension of the former UK-specific exam to prospective

Impressionism

captured the world's imagination in the late nineteenth century and remains with us today. Portraying the dynamic effects of modernity, impressionist artists revolutionized the arts and the wider culture. Impressionism transformed the very pattern of reality, introducing new ways to look at and think about the world and our experience of it. Its legacy has been felt in many major

contributions to popular and high culture, from cubism and early cinema to the works of Zadie Smith and W. G. Sebald, from advertisements for Pepsi to the observations of Oliver Sacks and Malcolm Gladwell. Yet impressionism's persistence has also been a problem, a matter of inauthenticity, superficiality, and complicity in what is merely "impressionistic" about culture today. Jesse Matz considers these two legacies—the positive and the negative—to explain impressionism's true contemporary significance. As *Lasting Impressions* moves through contemporary literature, painting,

and popular culture, Matz explains how the perceptual role, cultural effects, and social implications of impressionism continue to generate meaning and foster new forms of creativity, understanding, and public engagement. *Henry James and the Art of Impressions* CRC Press
Stella Adler (1901–92) trained many well-known American actors yet throughout much of her career, her influence was overshadowed by Lee Strasberg, director of the Actors Studio. In *Beyond Method: Stella Adler and the Male Actor*, Scott Balcerzak focuses on Adler's teachings and how she challenged Strasberg's psychological focus on the actor's "self" by promoting an

empathetic and socially engaged approach to performance. Employing archived studio transcripts and recordings, Balcerzak examines Adler's lessons in technique, characterization, and script analysis as they reflect the background of the teacher—illustrating her time studying with Constantin Stanislavski, her Yiddish Theatre upbringing, and her encyclopedic knowledge of drama. Through this lens, *Beyond Method* resituates the performances of some of her famous male students through an expansive understanding of the discourses of acting. The book begins by providing an overview

of the gender and racial classifications associated with the male "Method" actor and discussing white maleness in the mid-twentieth century. The first chapter explores the popular press's promotion of "Method" stars during the 1950s as an extension of Strasberg's rise in celebrity. At the same time, Adler's methodology was defining actor performance as a form of social engagement—rather than just personal expression—welcoming an analysis of onscreen masculinity as culturally-fluid. The chapters that follow serve as case studies of some of Adler's most famous students in notable roles—Marlon Brando in *A Streetcar Named Desire* (1951)

and The Missouri Breaks (1976), Robert De Niro in Taxi Driver (1976), Henry Winkler in Happy Days (1974–84), and Mark Ruffalo in The Avengers: Age of Ultron (2015). Balcerzak concludes that the presence of Adler altered the trajectory of onscreen maleness through a promotion of a relatively complex view of gender identity not found in other classrooms. Beyond Method considers Stella Adler as not only an effective teacher of acting but also an engaging and original thinker, providing us a new way to consider performances of maleness on the screen. Film and theater scholars, as well as those interested in gender

studies, are sure to benefit from this thorough study.

As forensic technology becomes more sophisticated, courts are demanding more scientific content and juries are expecting meticulous confirmation of facts alleged. Greater attention is now paid to increasingly finer details and improved methods of describing every form of evidence. Applying physics, chemistry, and engineering to the process of analysis and interpretation, Mechanics of Impression Evidence

reflects the shift to these heightened standards and offers a starting point for significant change in the way that impression evidence is considered, utilized, and presented.

Concepts discussed in this groundbreaking text include: The three-dimensional nature of the human fingerprint and a shift toward a more holistic image of the surface of friction skin. Dimensional stability and striation mark issues, which can change the way footwear outsoles are evaluated and compared. The research and development of electrostatic scans that could possibly save lives and locate or describe evidence as never before. The growing availability of

new measurement techniques that can improve evidence testimony. The use of personal experimentation to support conclusions or confirm that which is otherwise considered fact. Making use of logic and science to question our approach to impression evidence, this volume begins with simple ideas and basic notions and uses these building blocks to suggest and consider potentially controversial changes in the way evidence is located, interpreted, compared, and presented.

"As bibliographers or book historians, we perform our work by changing the function of the objects we study. We rarely pick up an Aldine edition to read one of the classical texts it contains. . . . Print culture, under this notion, is not a medium for writing or thought but a historical object of study; our

bibliographical field, our own concoction, becomes the true referent of the objects we define as its foundation."—From the Introduction What is a book in the study of print culture? For the scholar of material texts, it is not only a singular copy carrying the unique traces of printing and preservation efforts, or an edition, repeated and repeatable, or a vehicle for ideas to be abstracted from the physical copy. But when the bibliographer situates a book copy within the methods of book history, Joseph A. Dane contends, it is the known set of assumptions which govern the discipline that bibliographic arguments privilege, repeat, or challenge. "Book history," he

writes, "is us." In *Blind Impressions*, Dane reexamines the field of material book history by questioning its most basic assumptions and definitions. How is print defined? What are the limits of printing history? What constitutes evidence? His concluding section takes form as a series of short studies in theme and variation, considering such matters as two-color printing, the composing stick used by hand-press printers, the bibliographical status of book fragments, and the function of scholarly illustration in the Digital Age. Meticulously detailed, deeply learned, and often contrarian, *Blind Impressions* is a bracing critique of the way scholars define

and solve problems. *Cultural Techniques*

On February 15, 1982, the oil rig Ocean Ranger sank off the coast of Newfoundland taking the entire crew of eighty-four men — including the author's brother — down with it. It was the worst sea disaster in Canada

since the Second World War, but the memory of this event gradually faded into a sad story about a bad storm — relegated to the “Extreme Weather” section of the CBC archives. Susan Dodd resurrects this disaster from the realm of “history” and maps the socio-political processes of its aftermath, when power, money and collective hopes for the future revised the story of corporate indifference and betrayal of public trust into a “lesson learned” by an heroic industry advancing technology in the face of a brutal environment. This book is a navigational resource for other disaster aftermaths, including that of the Deepwater Horizon in the Gulf of Mexico, and

a call for vigilant government regulation of industry in all its forms.

Forensic Document Examination in the 21st Century Sönke Ahrens

Anchoring himself firmly on the ever-contested space of Indian Law and Legal Processes, and drawing substantive support from his rich and varied experience as a Law Enforcement Officer in the Police Department of Tamil Nadu, India, the author, V. Sithannan in presenting this scholarly work, has sought to fulfill the legitimate requirements of Police Officers, Advocates, Judicial Officers, Social Activists, NGOs, Gender Activists and the general public. The Author's utopian ideal

that no innocent person should be punished and no offender should go unpunished is the dominant message of the book. For this purpose, the Author has given a balanced treatment of the whole problem of crime and its investigation. The book contains 27 Chapters and 4 Annexures. For example, the 1st Chapter deals with the origin, growth and development of Military and Police and the succeeding chapters elaborate the structure, powers and the duties of police, the conduct of investigation, the first information report, the jurisdictional limitations of police, dying declaration, inquest, search and seizure, examination of

witnesses, arrest, interrogation, confession, bail, remand and custody, test identification parade, tender of pardon to approver, letter rogatory, extradition, burden of proof and presumptions, Police diaries, final report, further investigation and maintenance of Police records. The comparative chart given to aid the Police Officers to conclude whether death is suicidal or homicidal or accidental in all forms of death that are encountered by the Police while conducting investigation will be of immense use with scientific accuracy. Another Chart provided indicating the procedural steps starting from the collection of evidence

through the final analysis of the whole crime and its commission would surely empower the investigating officers with fool-proof methods of investigation. A most praise-worthy feature of the book is its detailed discussion on the immature juveniles, who are in conflict with law and the crimes against children and women. The annexure to the book is of immense use as a ready- reckoner, especially annexure I and II by which a Police Officer may easily find whether a particular offence in any of the most frequently used special enactment is cognizable, bailable etc. The Author has fulfilled the needs of the investigating Officers in the epilogue

by providing 47 points which may go against the prosecution, and therefore, has given 48 tips for the successful prosecution of a criminal case by a Police Officer. Again, in the spirit of an academic researcher, the Author has given a catalogue of 724 Checklists in all the Chapters so that the readers would find the book highly informative to have a statutorily authorised answer to any doubt in a given situation in any of the investigative procedures. The citation of 785 landmark judgements of various High Courts and the Supreme Court for the period 1965-2008 in the appropriate chapters is another outstanding feature of the book, making it vade mecum

for Police Officers, Advocates, Officers of Law and Courts and also for NGOs, Social Activists and Persons of Public Interest.

Platen Information Revealed

Walter de Gruyter GmbH & Co KG This is the second, revised and expanded edition. The first edition was published under the slightly longer title "How to Take Smart Notes. One Simple Technique to Boost Writing, Learning and Thinking - for Students, Academics and Nonfiction Book Writers". The key to good and efficient writing lies in the intelligent organisation of ideas and notes. This book helps students, academics and other knowledge workers to get more done, write intelligent texts and learn for the

long run. It teaches you how to take smart notes and ensure they bring you and your projects forward. The Take Smart Notes principle is based on established psychological insight and draws from a tried and tested note-taking technique: the Zettelkasten. This is the first comprehensive guide and description of this system in English, and not only does it explain how it works, but also why. It suits students and academics in the social sciences and humanities, nonfiction writers and others who are in the business of reading, thinking and writing. Instead of wasting your time searching for your notes, quotes or references, you can focus on what really

counts: thinking, understanding and developing new ideas in writing. Dr. Sönke Ahrens is a writer and researcher in the field of education and social science. He is the author of the award-winning book “Experiment and Exploration: Forms of World Disclosure” (Springer). Since its first publication, *How to Take Smart Notes* has sold more than 100,000 copies and has been translated into seven languages. Resources in education Oxford University Press This volume presents the preliminary results of the work carried out by the interdisciplinary cultural techniques research lab at the University of Erfurt. Taking up an impulse from media studies, its contributions examine

—from a variety of disciplinary perspectives—the interplay between the formative processes of knowledge and action outlined within the conceptual framework of cultural techniques. Case studies in the fields of history, literary (and media) studies, and the history of science reconstruct seemingly fundamental demarcations such as nature and culture, the human and the nonhuman, and materiality and the symbolical order as the result of concrete practices and operations. These studies reveal that particularly basic operations of spatialization form the very conditions that determine emergence within any cultural order. Ranging from

manual and philological "paper work" to practices of opening up and closing off spaces and collective techniques of assembly, these case studies replace the grand narratives of cultural history focusing on micrological examinations of specific constellations between human and nonhuman actors.

Courageous Methods in Cultural Psychology

The last 20 years have witnessed a revolution in reading research.

Cognitive psychologists, using high-speed computers to aid in the collection and analysis of data, have developed tools that have begun to answer questions that were previously thought unanswerable.

These tools allow for a "chronometric," or moment-to-moment, analysis of the reading process. Foremost among them is the use of the record of eye movements to help reveal the underlying perceptual and cognitive processes of reading. This volume provides a coherent framework for the research accomplished on the reading process over the past 15 years.

It emphasizes how readers go about extracting information from the printed page and how they comprehend the text.

The Renaissance of Etching is a groundbreaking study of the origins of the etched print. Initially used as a method for

decorating armor, etching was reimagined as a printmaking technique at the end of the fifteenth century in Germany and spread rapidly across Europe. Unlike engraving and woodcut, which required great skill and years of training, the comparative ease of etching allowed a wide variety of artists to exploit the expanding market for prints. The early pioneers of the medium include some of the greatest artists of the Renaissance, such as Albrecht Dürer, Parmigianino, and Pieter Bruegel the Elder, who paved the way for future

printmakers like Rembrandt, Goya, and many others in their wake. Remarkably, contemporary artists still use etching in much the same way as their predecessors did five hundred years ago. Richly illustrated and including a wealth of new information, The Renaissance of Etching explores how artists in Germany, the Netherlands, Italy, and France developed the new medium of etching, and how it became one of the most versatile and enduring forms of printmaking. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 14.0px Verdana}
