This literature-centered study offers an interdisciplinary approach to Romantic culture. It is pioneering in that it employs the complexity method of anthropology. Recent literary studies employ the complexity/chaos theory adapted from the natural sciences; however, here is presented for the first time a complexity method taken from the social/human sciences. This complexity method is useful in mediating not only contradictions within Romanticism, but the chaos of contemporary theories concerning it. One of the intensifying literary debates is that between the so-called "Greens" and "Reds," naturalists and humanists. Mediating Order and Chaos not only traces the split between nature and man to Romantic Culture but finds there, too, a Spinozian vision of man and nature in unity - thereby denying any naturalist/humanist split. This volume is of interest for those who wish to see essays in the holistic approach to culture. Centering on hydraulics, hydrology, and meteorology, this study examines literature, painting, music, economics, and the rhetoric of science, philosophy, and politics, it therewith demonstrates how the water cycle was transformed into a cosmic metaphor that mediated, in the form of several complex adaptive systems, between the chaos of too much change and that of not enough.

The Dictionary of Louisiana French (DLF) provides the richest inventory of French vocabulary in Louisiana and reflects precisely the speech of the period from 1930 to the present. This dictionary describes the current usage of French-speaking peoples in the five broad regions of South Louisiana: the coastal marshes, the banks of the Mississippi River, the central area, the north, and the western prairie. Data were collected during interviews from at least five persons in each of twenty-four areas in these regions. In addition to the data collected from fieldwork, the dictionary contains material compiled from existing lexical inventories, from texts published after 1930, and from

archival recordings. The new authoritative resource, the DLF not only contains the largest number of words and expressions but also provides the most complete information available for each entry. Entries include the word in the conventional French spelling, the pronunciation (including attested variants), the part of speech classification, the English equivalent, and the word's use in common phrases. The DLF features a wealth of illustrative examples derived from fieldwork and textual sources and identification of the parish where the entry was collected or the source from which it was compiled. An English-to-Louisiana French index enables readers to find out how particular notions would be expressed in la Louisiane.

Risk management practices are growing both in number and complexity in businesses, notably driven by new

regulatory standards that feature risk management at their core. Although large businesses are more likely to adopt a formal, holistic approach to risk management, the stakes are just as high for SMEs. Risk management in SMEs can contribute to a certain organizational, entrepreneurial and partnership dynamic which constitutes a real opportunity to evolve practices and improve performance. This book offers varied responses to this question by combining conceptual approaches, empirical illustrations and the associated managerial implications.
