Acta eruditorum

**Nova acta eruditorum** Brazil

Stretching from the arrival of Christopher Columbus in 1492 to the state of affairs in America in the year 2000, these timetables present a panoramic perspective on the nation's significant events of the second millennium. Line drawings throughout.

**Tychonis Brahe Mathim: Eminent: Dani Opera Omnia, Sive Astronomiæ Instauratæ Progymnasmata In duas partes distributa** Simon and Schuster

The available material in English discussing Latin American anarchism tends to be fragmentary, country-specific, or focused on single individuals. This new translation of Ángel Cappelletti's wide-ranging, country-by-country historical overview of anarchism's social and political achievements in fourteen Latin American nations is the first book-length regional history ever published in English. With a foreword by the translator. Ángel J. Cappelletti (1927-1995) was an Argentinian philosopher who taught at Simon Bolivar University in Venezuela. He is the author of over forty works primarily investigating philosophy and anarchism. Gabriel Palmer-Fernandez is Distinguished Professor of Philosophy and Religious Studies at Youngstown State University.

Revista da propriedade industrial.

*Tychonis Brahe Opera omnia, sive Astronomiæ instauratæ progymnasmata*

Jesuits established a large number of astronomical, geophysical and meteorological observatories during the 17th and 18th centuries and again during the 19th and 20th centuries throughout the world. The history of these observatories has never been published in a complete form. Many early European astronomical observatories were established in Jesuit colleges. During the 17th and 18th centuries Jesuits were the first western scientists to enter into contact with China and India. It was through them that western astronomy was first introduced in these countries. They made early astronomical observations in India and China and they directed for 150 years the Imperial

Observatory of Beijing. In the 19th and 20th centuries a new set of observatories were established. Besides astronomy these now included meteorology and geophysics. Jesuits established some of the earliest observatories in Africa, South America and the Far East. Jesuit observatories constitute an often forgotten chapter of the history of these sciences.
