Burning Nation (Divided We Fall, Book 2)  
A E I Press

In *Nations Divided*, Don H. Doyle looks at some unexpected parallels in American and Italian history. What we learn will reattune us to the complexities and ironies of nationalism. During his travels around southern Italy not long ago, Doyle was caught off guard by frequent images of the Confederate battle flag. The flag could also be seen, he was told, waving in the stands at soccer matches. At the same time, a political movement in northern Italy called for secession from the South. A historian with a special interest in the long troubled relationship between the American South and the United States, Doyle was driven to understand the forces that unite and divide nations from within. The Italian South had been at odds with the more prosperous, metropolitan North of Italy since the country's bloody unification struggles in the 1860s. Thousands of miles from Doyle's Tennessee home was an eerily familiar scenario: a South characterized in terms of its many perceived problems by a North eager to define national ideals against the

southern "other." From this abruptly decentered perspective, Doyle reexamines both countries' struggle to create an independent, unified nation and the ongoing effort to instill national identity in their diverse populace. The Fourth of July and Statuto Day; Lincoln and Garibaldi; the Confederate States of America and the secessionist dreams of Italy's Northern League; NAFTA and the European Union--such topics appear in telling juxtaposition, both inviting and defying easy conclusions. At the same time, Doyle negotiates the conceptual slipperiness of nationalism by discussing it as both constructed and real, unifying and divisive, inspiration for good and excuse for atrocity. "Americans like to think of themselves as being innocent of the vicious ethnic warfare that has raged in the Old World and over so much of the globe," writes Doyle. "Europeans, in turn, enjoy reminding Americans of how little history they have." This enlightening, challenging meditation shows us that Europeans and Americans have much to learn from the common history of nationalism that has shaped both their worlds.

We live in angry times. No matter where we go, what we watch, or how we

communicate, our culture is rife with division and polarization. Unfortunately, Christians appear to be caught up in the same animosity as the culture at large. While our faith calls us to Christian unity, the hard fact remains: our churches are tragically divided across class, ethnic, gender, and political lines. As these social chasms grow--both inside and outside the church--the role of the preacher becomes paramount. This book issues a prophetic call to pastors to use the influence of their pulpits to promote reconciliation and unity in their churches and communities. Two scholar-practitioners who are experts in homiletics and reconciliation present a practical, 7-step model that empowers faithful leaders to bring healing and peace to their fractured churches and world. The book includes questions for reflection, salient illustrations, and an accountability covenant. It also includes useful appendixes on preaching themes, preaching texts, and sample sermons from three leading preachers: Ralph Douglas West, Rich Villodas, and Sandra Maria Van Opstal.

In this wrenching sequel to *Divided We Fall*, Danny and friends fight to defend Idaho against a Federal takeover and the ravages of a Burning Nation. At the end of *Divided We Fall*, Danny Wright's beloved Idaho had been invaded by the federal government, their electricity shut off, their rights suspended. Danny goes into hiding with his friends in order to remain free. But after the state declares itself a Republic, Idaho rises to fight in a second American Civil War, and Danny is right in the center of the action, running guerrilla missions with his fellow soldiers to break the Federal occupation. Yet what at first seems like a straightforward battle against governmental repression quickly grows more complicated, as more states secede, more people die, and Danny discovers the true nature of some of his new allies. Chilling, powerful, and all too plausible, *Burning Nation* further establishes Trent Reedy as a provocative new voice in YA fiction.

"A house divided against itself cannot stand." When Abraham Lincoln spoke these words in 1858, a deadly storm was brewing in the United States. Many in the South no longer wanted to remain a part of the country. They wanted to form their own country, where slavery remained legal and where Northerners stayed out of Southerners' business. In 1861, the storm hit. The "house" of the United States was split in half by a terrible war that would drag on for years. Before the Civil War ended, more than half a million soldiers would die in what would be, and still remains, the conflict that has claimed the greatest number of American lives. But when the clouds of this war of brother against brother finally cleared, nearly four million African Americans had been freed from bondage--and the divided house was whole again.

This volume brings together the recent essays of Richard Ned Lebow, one of the leading scholars of international relations and US foreign policy. Lebow's

work has centred on the instrumental value of ethics in foreign policy decision making and the disastrous consequences which follow when ethical standards are flouted. Unlike most realists who have considered ethical considerations irrelevant in states' calculations of their national interest, Lebow has argued that self interest, and hence, national interest can only be formulated intelligently within a language of justice and morality. The essays here build on this pervasive theme in Lebow's work by presenting his substantive and compelling critique of strategies of deterrence and compellence, illustrating empirically and normatively how these strategies often produce results counter to those that are intended. The last section of the book, on counterfactuals, brings together another set of related articles which continue to probe the relationship between ethics and policy. They do so by exploring the contingency of events to suggest the subjective, and often self-fulfilling, nature of the frameworks we use to evaluate policy choices.

This book of fiction contains references to historical facts. There were actually families who were split asunder by the choice of defending the North or the South. History shows that the Southern Home Guard became a source of disgrace to most southerners. The destruction of the Southern homes, fields and courthouses by General Sherman were used to force the people to surrender and swear allegiance to the United States of America. Immense suffering and death occurred on both sides. The psychological injury to the nation's psyche endures even today in

some parts of the country.

Michael Udoekpo's work brilliantly and pastorally discusses the issues of conflict, friction, and disunity in the world--and in Nigeria in particular--from biblical, historical, and sociocultural perspectives. These issues, he stresses, are endemic in various fabrics of the Nigerian society, traceable to the family as the foundation of any given society. They are also found in religious, political, and media groups. Contributing factors, Udoekpo argues, are materialism, infidelity, relativism, and fundamentalism. Others are ethnocentrism, anthropocentrism, ignorance, bribery, and corruption with other forms of injustices. Drawing from the Bible, Udoekpo proposes prayer, proper education, truth-telling, restoration of family values, interreligious and cultural dialogue, ecumenism, enforcement of rule of law, faith, and absolute trust in God as antidotes to conflict, violence, friction, and disunity in our contemporary society.

The Civil War has long been described as a war pitting "brother against brother." The divided family is an enduring metaphor for the divided nation, but it also accurately reflects the reality of America's bloodiest war. Connecting the metaphor to the real experiences of families whose households were split by conflicting opinions about the war, Amy Murrell Taylor provides a social and cultural history of the divided family in Civil War America. In hundreds of border state households, brothers--and sisters--really did fight one another, while fathers and sons argued over secession

and husbands and wives struggled with opposing national loyalties. Even enslaved men and women found themselves divided over how to respond to the war. Taylor studies letters, diaries, newspapers, and government documents to understand how families coped with the unprecedented intrusion of war into their private lives. Family divisions inflamed the national crisis while simultaneously embodying it on a small scale--something noticed by writers of popular fiction and political rhetoric, who drew explicit connections between the ordeal of divided families and that of the nation. Weaving together an analysis of this popular imagery with the experiences of real families, Taylor demonstrates how the effects of the Civil War went far beyond the battlefield to penetrate many facets of everyday life. *Natural Gas Supplies: pt. 1 and v. 1, pt. 2. What happened to the United States of America? Simply put, forgotten who she was. The foundation principles inspired by God and established by the Constitution no longer have meaning in the Halls of Congress. The cornerstone doctrine of a limited central government has been forgotten. Excessive taxation, out of control spending, and unsustainable debt have the United States on the road to bankruptcy. Worse yet is the social demise of America's greatest asset, the American individual. Can America rediscover herself? She will or she will fail. This book tells the story where America went off course and reveals the sacred principles to which she must return to find her glory. Book jacket.

This re-evaluation of the role of regional policy in the UK has been accompanied by a much closer identification of regional policy with national economic policymaking. This book, drawing upon the contributions of a large number of experts in the field in the UK, sets the debate on the future of spatial policy explicitly within the context of the economics and politics of the North-South divide. Recent policy debates in the United Kingdom have highlighted two major issues which will shape future policy developments and their impact in the 1990s - the persistence of pronounced regional economic and social imbalances and the shift away from traditional perceptions of the role of regional policy, with a new emphasis on inner-city as opposed to regional problems. In this collection by leading researchers in the field, the role of regional policy in the UK is re-evaluated against a background of renewed debate on the economic disparities inherent in the north-south divide and an assessment of the implications for future policy.

For ethnic minorities in Europe separated by state borders—such as Basques in France and Spain or Hungarians who reside in Slovakia and Romania—the European Union has offered the hope of reconnection or at least of rendering the divisions less obstructive. Conationals on different sides of European borders may look forward to increased political engagement, including new norms to support the sharing of sovereignty, enhanced international cooperation, more porous borders, and invigorated protections for minority rights. Under the pan-European umbrella, it has been

claimed that those belonging to divided nations would no longer have to depend solely on the goodwill of the governments of their states to have their collective rights respected. Yet for many divided nations, the promise of the European Union and other pan-European institutions remains unfulfilled. Divided Nations and European Integration examines the impact of the expansion of European institutions and the ways the EU acts as a confederal association of member states, rather than a fully multinational federation of peoples. A wide range of detailed case studies consider national communities long within the borders of the European Union, such as the Irish and Basques; communities that have more recently joined, such as the Croats and Hungarians; and communities that are not yet members but are on its borders or in its "near abroad," such as the Albanians, Serbs, and Kurds. This authoritative volume provides cautionary but valuable insights to students of European institutions, nations and nationalism, regional integration, conflict resolution, and minority rights.

This book argues that Malaysia's electoral politics have historically been premised on a hybridized model of communalism and consociationalism. Beyond this it posits a newer idea of

power sharing based on the dynamic and transformative practice of mediated communalism through six decades (1952-2016) of electoral politics. The strategy of mediating communalism is critically explored throughout the book, serving to test its saliency as a distinct approach to power sharing in a social formation which is ethnically, religiously and regionally divided, yet has remained remarkably and tenuously integrated throughout Malaysia's electoral history. The book delves into this question by narrating and theorizing the complexity of communal politics leading to the emergence of new politics which have attempted to put Malaysia on the track of further democratization. It is further implied that new politics has to work in tandem with mediated communalism to transcend the most deleterious effects of an ethnically divided society.

The first thoroughly interdisciplinary study to examine how the transatlantic relationship between the United States

and Britain helped shape the conflicts between North and South in the decade before the American Civil War, *Twice-Divided Nation* addresses that influence primarily as a problem of national memory. Samuel Graber argues that the nation was twice divided: first, by the sectionalism that resulted from disagreements concerning slavery; and second, by Unionists' increasing sense of alienation from British definitions of nationalism. The key factor in these diverging national concepts of memory was the emergence of a fiercely independent press in the U.S. and its connections to Britain and British news. Failing to recognize this shifting transatlantic dynamic during the Civil War era, scholars have overlooked the degree to which the conflict between the Union and the Confederacy was regarded at home and abroad as a referendum not merely on Lincoln's election or the Constitution or even slavery, but on the nationalist claim to an independent past. Graber shows how this movement toward cultural independence was reflected in a distinctively American literature, manifested in the writings of such diverse figures as journalist Horace Greeley and poet Walt Whitman.
