Swahili By: Ulf L. Nilsson Swahili, in its various forms, is one of the most important and widely spoken languages in the world with more than 100 million Bantu speakers who inhabit East and Central Africa south of the Equator. Swahili lives in two different worlds. One being the standardized Swahili that is spoken in Tanzania as a strict language and with an authority that oversees its proper use. The other is the world that does not follow standardized rules. The primary difference between the two is the Arabic influence in the east and the Bantu structure in the west with loanwords mainly from French. The problem with the various Swahilis is that some Bantu Swahili speakers have complained that in order to speak proper Swahili, they have to learn Swahili at school at the same time that they learn their uncontrolled local Bantu Swahili. There is, and has been, a concern about the future of Swahili, that the officially approved version will be corrupted by loanwords and slang. On the other side, others are worried that Swahili lacks openness towards "living words," i.e. word

borrowings. Ulf L. Nilsson presents a chronicle about the Swahili family, and its lingual neighbors with eyes on Arabic heritage, external influences, cultural history, religion, and politics. Swahili: A Family Chronicle contains good readings about Swahili and the Bantu family in Tanganyika, Kenya, Uganda, and the Congo.

Intensive Interaction is an approach to teaching the fundamentals of communication to children and adults who have severe learning difficulties or autism, and who are still at an early stage of communication development. Its simplicity and effectiveness has been one of the major themes in the widespread practitioner dissemination that has taken place during the last twenty years. Despite the human simplicity of the approach, intensive interaction relates to, or is influenced in practice by, a wide range of interconnecting theories and academic standpoints. With contributions from leading authorities, Dave Hewett provides a comprehensive and detailed description of the theoretical landscape of a now established methodology. The most prominent related theories and issues are reviewed, with Intensive Interaction set within their contexts. Issues covered include: - the approach within education and the curriculum - intensive interaction within adult services - effects on organisational change and development - neurology and learning outcomes - intensive Interaction and the Central Triad of autism - emotional learning and development outcomes - adoption of Intensive Interaction Providing a timely theoretical and academic overview to Intensive Interaction practice, this book marks a substantial theoretical waypoint to future development of interactive approaches generally. It is a vital resource of in-depth knowledge for anyone studying Special Educational Needs and Education. Dave Hewett is an independent educational consultant and has published widely on Intensive Interaction since his role in its development.
