Drawing on examples from the global North and South, this book examines the relationship between migration, development and diaspora engagement from a governance perspective. It explores the ways that governments interact with their own extra-national diasporic populations in order to boost economic development, build global trading and investment networks, and increase their

political leverage overseas. Inside, readers will find fifteen essays which highlight such issues as diaspora engagement by governments at different scales, the divisions that often exist within diaspora groups, diaspora transnationalism and return migration, diaspora knowledge networks and higher education capacity building, and the neglected issues of South-South migration and diasporas as well as North-South migration and diasporas. The book presents empirical case studies from various geographical contexts including Australia, Canada, the Philippines, India, the Caribbean, Zimbabwe, and the United States. Overall,

this book presents fresh insights into how and why migrant-sending countries are increasingly turning to the diaspora option to attempt to benefit from the transfer of knowledge, skills and financial and social capital. It provides policy makers, researchers, and students with new perspectives on governance and the means by which states are attempting to utilize their diaspora resources.

This work will hold great value for people involved in the study of Macroeconomics, International Trade, Labour Economics, Public Economics and Econometrics.

The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political

problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, *Good Economics for Hard Times* makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an

extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

International Macroeconomics in the Wake of the Global Financial Crisis

McGraw-Hill Education

Authors Bob Frank, Ben Bernanke, and introducing Kate Antonovics from the University of California San Diego, present a coherent short list of core principles in introductory economics and reinforce them by illustrating and applying each in numerous contexts. With engaging questions, explanations and exercises, the authors help students relate economic principles to a host of everyday experiences such as going to the ATM or purchasing airline tickets. Throughout this process, the authors encourage students to become "economic naturalists:" people who employ basic economic principles to understand and explain what they observe in the world around them. *Principles of Microeconomics*, sixth edition, is thoroughly integrated with the adaptive digital tools available in McGraw-Hill's LearnSmart Advantage Suite, proven to increase student engagement and success

Nicomachean Ethics Aristotle - The Nicomachean Ethics is one of Aristotle's most widely read and influential works. Ideas central to ethics—that happiness is the end of human endeavor, that moral virtue is formed through action and habituation, and that good action requires prudence—found their most powerful proponent in the person medieval scholars simply called "the Philosopher." Drawing on their intimate knowledge of Aristotle's thought, Robert C. Bartlett and Susan D. Collins have produced here an English-language translation of the Ethics that is as remarkably faithful to the original as it is graceful in its rendering. Aristotle is well known for the precision with which he chooses his words, and in this elegant translation his work has found its ideal match. Bartlett and Collins provide copious notes and a glossary providing context and further explanation for students, as well as an introduction and a substantial interpretive essay that sketch central arguments of the work and the seminal

place of Aristotle's Ethics in his political philosophy as a whole. The Nicomachean Ethics has engaged the serious interest of readers across centuries and civilizations—of peoples ancient, medieval, and modern; pagan, Christian, Muslim, and Jewish—and this new edition will take its place as the standard English-language translation.

Principles of Economics PublicAffairs #1 NEW YORK TIMES BESTSELLER • More than one million copies sold! A "brilliant" (Lupita Nyong'o, Time), "poignant" (Entertainment Weekly), "soul-nourishing" (USA Today) memoir about coming of age during the twilight of apartheid "Noah's childhood stories are told with all the hilarity and intellect that characterizes his comedy, while illuminating a dark and brutal period in South Africa's history that must never be forgotten."—Esquire Winner of the Thurber Prize for American Humor and an NAACP Image Award • Named one of the best books of the year by The New York Time, USA Today, San Francisco Chronicle, NPR, Esquire, Newsday, and Booklist Trevor Noah's unlikely path from apartheid South Africa to the desk of The Daily Show began with

a criminal act: his birth. Trevor was born to a white Swiss father and a black Xhosa mother at a time when such a union was punishable by five years in prison. Living proof of his parents' indiscretion, Trevor was kept mostly indoors for the earliest years of his life, bound by the extreme and often absurd measures his mother took to hide him from a government that could, at any moment, steal him away. Finally liberated by the end of South Africa's tyrannical white rule, Trevor and his mother set forth on a grand adventure, living openly and freely and embracing the opportunities won by a centuries-long struggle. Born a Crime is the story of a mischievous young boy who grows into a restless young man as he struggles to find himself in a world where he was never supposed to exist. It is also the story of that young man's relationship with his fearless, rebellious, and fervently religious mother—his teammate, a woman determined to save her son from the cycle of poverty, violence, and abuse that would ultimately threaten her own life. The stories collected here are by turns hilarious, dramatic, and deeply affecting. Whether subsisting on caterpillars for

dinner during hard times, being thrown from a moving car during an attempted kidnapping, or just trying to survive the life-and-death pitfalls of dating in high school, Trevor illuminates his curious world with an incisive wit and unflinching honesty. His stories weave together to form a moving and searingly funny portrait of a boy making his way through a damaged world in a dangerous time, armed only with a keen sense of humor and a mother's unconventional, unconditional love.

Good Economics for Hard Times

HarperCollins

This book collects selected articles addressing several currently debated issues in the field of international macroeconomics. They focus on the role of the central banks in the debate on how to come to terms with the long-term decline in productivity growth, insufficient aggregate demand, high economic uncertainty and growing inequalities following the global financial crisis. Central banks are of considerable importance in this debate since understanding the sluggishness of the recovery process as well as its implications for the natural interest rate are key to assessing output gaps and the monetary policy stance. The authors argue that a more dynamic domestic and external aggregate demand helps to raise the inflation rate, easing the constraint deriving from the zero lower bound and allowing monetary policy to depart from its current ultra-

accommodative position. Beyond macroeconomic factors, the book also discusses a supportive financial environment as a precondition for the rebound of global economic activity, stressing that understanding capital flows is a prerequisite for economic-policy decisions.

This second volume covers all the conventional topics of international monetary theory and open-economy macroeconomics, and a lot more besides. Gandolfo treats such further concepts as the theory of monetary integration and the European monetary union, foreign exchange crises and the Tobin tax, theory of games and international policy coordination. It follows the "two-tier" structure of the first volume, and, thanks to its self-contained treatment, may equally be used as a reference book.

"Many students who take introductory

economics courses have difficulty seeing the relevance of the key concepts of opportunity cost, trade-offs, scarcity, and demand and supply to their lives and their careers. This reduces the willingness of many students to prepare for class and to be engaged during class. With this textbook, we show them how to apply economic thinking creatively to improve their work, their choices, and their daily lives. One of our main objectives in writing this textbook was to show that the fundamentals of economics are not just exciting but also alive with myriad personal applications"--

Brian Abel-Smith was one of the most influential figures in the shaping of social welfare in the twentieth century. A modern day Thomas Paine, the British economist and expert advisor was driven to improve the lives of the poor, working with groups like the World Health Organization, International Labour Organization, and the World Bank to help bring health and social welfare services to millions across the globe. *The Passionate Economist* is the first biography to chronicle his life and the many programs he helped create. Sally

Sheard details Abel-Smith's work as an economist and advocate, setting it against the backdrop of the larger history of health and social welfare development since the 1950s. She analyzes these developments and the effects that long-running welfare debates have had on both poverty and state responses to it. She compares welfare implementation in different developing countries and examines how it was administered by the agencies for which Abel-Smith worked. The result is an accessible book on a leading humanitarian and, through him, a history of exactly how we have cared for each other in the globalized era.

A Rational Expectations Approach to Macroeconometrics pursues a rational expectations approach to the estimation of a class of models widely discussed in the macroeconomics and finance literature: those which emphasize the effects from unanticipated, rather than anticipated, movements in variables. In this volume, Fredrick S. Mishkin first theoretically develops and discusses a unified econometric treatment of these models

and then shows how to estimate them with an annotated computer program.

“Both a masterpiece about the universal human condition and a masterpiece of Native American literature. . . . A book everyone should read for the joy and emotion of the language it contains.” — The Paris Review A special 50th anniversary edition of the magnificent Pulitzer Prize-winning novel from renowned Kiowa writer and poet N. Scott Momaday, with a new preface by the author A young Native American, Abel has come home from war to find himself caught between two worlds. The first is the world of his father’s, wedding him to the rhythm of the seasons, the harsh beauty of the land, and the ancient rites and traditions of his people. But the other

world—modern, industrial America—pulls at Abel, demanding his loyalty, trying to claim his soul, and goading him into a destructive, compulsive cycle of depravity and disgust. An American classic, *House Made of Dawn* is at once a tragic tale about the disabling effects of war and cultural separation, and a hopeful story of a stranger in his native land, finding his way back to all that is familiar and sacred.

Looks at the role of Native peoples, both Indian and Metis, in the economy of northern Manitoba from 1870 to the Depression, arguing that they played an important part in the transitional era between the mercantile fur trade and the emerging industrial economy of the mid-

20th century. Reconstructs the evolution of the economy of the fur trade era, showing that natives responded to the market economy in enterprising ways but were obstructed by government policy. Includes bandw photos and diagrams. Annotation copyrighted by Book News, Inc., Portland, OR
