International Journal of Educational Management and Development Studies (IJEMDS) is an open access refereed journal focused on educational leadership, educational management, teaching and learning across all disciplines and levels, internationalization of education, transnational education and societal issues on educational development. The field of education has been continuously evolving as influenced by its nature and the societal factors. As the journal

celebrates the very dynamic and complex nature of education, it provides educators and researchers a platform for their research findings. This allows researchers to apply multiple designs to describe, analyze and evaluate the history, current issues and the future direction of education in regional and international contexts.

Elsevier

This edited book deals with plant genetic resources and their status, availability, and ecological niche in natural habitat. Usage and conservation practices followed by various tribal communities and their rationale are also discussed in

the book. The book explores application of biological tools to conserve plant species and optimization protocols for conservation and elicitation of secondary metabolites and other value addition products. The book is organized into sub-themes covering: (i) Ecological status of plant genetic resources (ii) Traditional ethnobotanical knowledge and conservation practices (iii) Ex-situ conservation practices and bioprospecting Globally, plant genetic resources are deeply rooted in culture and economy. Since the early 1990s, the changing socio-economic situation has increasingly put pressure on plant genetic resources, in some cases leading to a severe loss of their diversity. For this reason, most vulnerable areas at risk of genetic erosion have been

demarcated and protected by forest laws and regulations. Therefore, this book brings to light the opinions of leading experts in the area of ecology, conservation biodiversity, ethnobotany, and bioprospecting of plant genetic resources. The book is for use by graduate and advanced undergraduate students and researchers in plant physiology, molecular biology, biochemistry, and agriculture.

Additionally, it is extremely useful as a general reference on conservation of flora and large-scale cultivation.

This book critically assesses the role of agrobiodiversity in school gardens and its contribution to diversifying diets, promoting healthy eating habits and

improving nutrition among schoolchildren as well as other benefits relating to climate change adaptation, ecoliteracy and greening school spaces. Many schoolchildren suffer from various forms of malnutrition and it is important to address their nutritional status given the effects it has on their health, cognition, and subsequently their educational achievement. Schools are recognized as excellent platforms for promoting lifelong healthy eating and improving long-term, sustainable nutrition security required for optimum educational outcomes. This book reveals the multiple benefits of school gardens for improving nutrition and education for children and their families. It examines issues such as school feeding, community food production, school

gardening, nutritional education and the promotion of agrobiodiversity, and draws on international case studies, from both developed and developing nations, to provide a comprehensive global assessment. This book will be essential reading for those interested in promoting agrobiodiversity, sustainable nutrition and healthy eating habits in schools and public institutions more generally. It identifies recurring and emerging issues, establishes best practices, identifies key criteria for success and advises on strategies for scaling up and scaling out elements to improve the uptake of school gardens.

Learning & Living in the 21st Century i Tm for H.s.' 2007 Ed. Rex Bookstore, Inc. This book explores the philosophical, ideological and practical dimensions of

curriculum using an intercultural lens. It is cross-cultural, comparative and inclusive, with each chapter featuring case studies from a minimum of three countries across different continents. By using the same methods of data collection and analysis for each country level in each chapter, the text explores relationships of curriculum theory, policy and practice both within and between countries. A diverse range of themes is explored, including; social justice and teacher preparation curriculum, language education curriculum, early childhood education and music, curriculum as praxis, curriculum and globalisation, science curriculum, teacher leadership in curriculum implementation, as well as curriculum and history. The exploration of these

themes lays the foundation for open dialogue and innovative approaches in exploring curriculum issues within, between and across cultures and contexts.

Education is the key to America's economic growth and prosperity and to our ability to compete in the global economy. It is the path to higher earning power for Americans and is necessary for our democracy to work. It fosters the cross-border, cross-cultural collaboration

required to solve the most challenging problems of our time. The National Education Technology Plan 2010 calls for revolutionary transformation.

Specifically, we must embrace innovation and technology which is at the core of virtually every aspect of our daily lives and work. This book explores the National Education Technology Plan which presents a model of learning powered by technology, with goals and recommendations in five essential areas: learning, assessment, teaching, infrastructure and productivity.

Education is gearing towards, preparing individuals to live in together since ancient times. However, the nation of Learning to Live Together is clearly

shaped only very recently by the UNESCO s International Commission on Education for the Twenty-first Century. The Commission emphasised that education for the 21st century based on four pillars, namely, Learning to know, Learning to do, Learning to be and Learning to live together. The first three pillars are essential for the sound development of persons, communities or individual nations, but the fourth pillar, learning to live together, is of a different more global nature: its omission may result in the annihilation of all other educational, cultural, health and developmental efforts through war, terrorism, deterioration of resources, pandemics, etc.

The aim of this book is to provide a concise presentation of the theory and practice in the field of management studies, with particular emphasis on effective and innovative practices. The scope is comprehensive and research-based and yet presents the content in an accessible manner, ready to be applied in management practice. The book presents conventional and newer tools for research in management studies. These themes are anchored in the core elements of management studies, together with inputs from current research efforts. By adding quality research articles and related case studies, it can form a solid base for researchers in the management. With a general grounding in the strategy literature including key references, it

might even serve as a useful core text for PhD students with a general interest in the management field. R & D teams in the twenty-first century will work on complex problems that require the input of a variety of disciplines, and often involve collaboration among specialists located on different continents. Add the business dimensions of marketing, finance, design, production, and legal assistance, and the management of research, development, and innovation is clearly demanding. This book is directed primarily to students, academicians and other professionals in the field of management. Beyond the quality professional group, the book will also attract attention of research scholars pursuing PhD in the field of management. At a glance, this book is

targeted to the needs of individuals engaged in the field of teaching and research of management. Creative and innovative topics are presented to the audience in a way that enables them to incorporate new proficiencies into their day-to-day work. We would like to thank all the contributors who have made the production of this book so fascinating and enjoyable. Their scholarship and dedicated commitment and motivation to 'getting it right' are the keys to the book's quality, and we greatly appreciate their good nature over many months in the face of our editorial demands and time limits. We are also grateful for using their texts, ideas, and critical remarks. We would also like to thank Dr Craig N Refugio, Dr D Ayub Khan Dawood, all reviewers and all

authors for their help in consolidating the interdisciplinary of the book. We are grateful to all the 18 institutions for their support. It will not be possible to bring out this edition.
