McGraw-Hill Education (UK)

Each unit includes guided reading, vocabulary building, skillbuilder practice, geography applications, primary sources, literature selections, reteaching activities, enrichment activities for gifted and talented students, history workshop resources and answer key.

*The Elusive Quest for Prosperity in
Mexico* Edward Elgar Publishing

The world's human population now constitutes the largest driving force of changes to the biosphere. Emerging water challenges require new ideas for governance and management of water resources in the context of rapid global change. This book presents a new approach to water resources, addressing global sustainability and focusing on socio-ecological resilience to changes. Topics covered include the risks of unexpected change, human impacts and

dependence on global water, the prospects for feeding the world's population by 2050, and a pathway for the future. The book's innovative and integrated approach links green and blue freshwater with terrestrial and aquatic ecosystem functions and use. It also links changes arising from land-use alteration with the impacts of those changes on social-ecological systems and ecosystem services. This is an important, state-of-the-art resource for academic researchers and water resource professionals, and a key reference for graduate students studying water resource governance and management.

A Microcredit Alternative in South Asia
W. W. Norton & Company

This revised and extended second edition evaluates the diverse approaches to organizational change that have defined the field. Explaining the assumptions and implications that accompany these diverse philosophies, this book demystifies the complexities of conflicting perspectives and delivers valuable insights into the research and

practice of organizational change.

Water Resources Activities in the United States Harcourt College Pub

This wide-ranging handbook presents in-depth discussions on the array of subspecialties that comprise the field of sociological theory. Prominent theorists working in a variety of traditions discuss methodologies and strategies; the cultural turn in sociological theorizing; interaction processes; theorizing from the systemic and macro level; new directions in evolutionary theorizing; power, conflict, and change; and theorizing from assumptions of rationality.

Teaching To Learn, Learning To Teach
Routledge

Microcredit took the development world by storm as a tool for poverty alleviation in the 1980s. After being hailed as a panacea, a few decades on it started being forcefully criticised based on its practice. This book explores Akhuwat (literally brotherhood), a rapidly growing Pakistani NGO formed in 2001, which addresses the shortcomings of conventional microfinance. Its vision is of a society built on empathy and social solidarity and its mission is that of creating self-sufficiency among the entrepreneurial poor. This book examines whether Akhuwat fulfils its promises of not pushing loans or encouraging clients to get on a debt treadmill and helping them to avoid high debt burdens by charging no interest and easing repayment terms.

Conventional microcredit organizations are criticised for losing sight of the original mission of poverty alleviation by engaging in empire building and Akhuwat's goal is to avoid this by embracing an alternative strategy of scaling up. Finally, this book also analyses Akhuwat's approach as being

gender sensitive and embracing all religions, castes and ethnicities. Based on fieldwork designed to assess if Akhuwat is the microcredit alternative it claims to be, this book will be of interest to scholars of poverty and development studies in general and microcredit in particular.

Another Development Impact Evaluation in Practice, Second Edition

This book is an important intervention in the debate between economic and social development. It makes the case for understanding development in economic terms as well as in terms of well-being, empowerment and participation.

Sharing the World Teacher Created Resources

2017 marked the seventy-fifth anniversary of Schumpeter's *Capitalism, Socialism and Democracy*, a work acknowledged as one of the most insightful books written in the twentieth century. It retains a contemporary quality, and still invites criticisms, new interpretations, and extensions and across disciplines. This book, in addition to re-examining Schumpeter's seminal work and undertaking a twenty-first-century update of its main themes, brings together leading social scientists to provide contemporary amendments, extensions - or eventually refutations - of key elements of Schumpeter's vision and thesis. Issues covered include a new take on creative destruction, the contours of a theory of innovative enterprise, finance and financialisation, a critique of the secular stagnation thesis, Schumpeter's contributions to a theory of the entrepreneurial state, his conception of socialism and its current relevance for understanding the 'China model' as well as a rekindling of his democracy thesis for our times. Bringing together leading international

contributors, this book provides fresh perspectives on ideas that continue to be hugely relevant to contemporary social sciences and a guide for understanding the current tensions among capitalism, the state and democracy. These chapters will be of interest to economists, social scientists and anyone with an interest in modern capitalism.

how humans will have to keep pace with machines in order to become prosperous in the future and identify strategies and policies for business and individuals to use to combine digital processing power with human ingenuity.

UGC NET JRF Commerce Book | Study Materials National Academies Press

The first-ever biography written about a woman of the Northwest Coast's Kwakwakawakw people, *Paddling to Where I Stand* presents the memoirs of Agnes Alfred (c.1890-1992), a non-literate noble Qwiqwasutinixw woman of the Kwakwakawakw Nation and one of the last great storytellers among her peers in the classic oral tradition. Agnes Alfred documents through myths, historical accounts, and personal reminiscences the foundations and the enduring pulse of her living culture. But this is more than another anthropological interpretation; it is the first-hand account of the greatest period of change the Kwakwaka'wakw people experienced since first contact with Europeans, and Alfred's memoirs flow from her urgent desire to pass on her knowledge to younger generations.

Study Guide and Student Resources to Accompany Essentials of World Regional Geography Inter-American Development Bank

This book investigates the entangled relations between people's daily worship practices and their Umwelt in South India. Focusing on the practices of spirit (būta) worship in the coastal area of Karnataka, it examines the relationship between people and deities. Based on extensive fieldwork, this book links important anthropological theories on personhood, perspectives, transactions, and gift-exchanges together with the Gestaltkreis theory of Viktor von

Weizsäcker. First, it examines the relations between būta worship and land tenure, matriliney, and hierarchy in the society. It then explores the reflexive relationship between modern law and current practices based on conventional law, before examining new developments in būta worship with the rise of mega-industries and environmental movements. Furthermore, this book sheds light on the struggles and endeavours of the people who create and recreate their relations with the realm of sacred wildness, as well as the formations and transformations of the Umwelt in perpetual social-political transition. *Modernity and Spirit Worship in India* will be of interest to academics in the field of anthropology, religious studies and the dynamics of religion, and *South Asian Culture and Society*.

Published by OpenStax College, U.S.
History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

Hearings Before the Committee on Appropriations, House of Representatives, Ninety-first Congress, First Session Routledge

This ground-breaking book combines detailed analysis of the forest sector with modern strategic management principles to develop a vision for sustainable forest management which is both practical and theoretically robust. The book adopts a holistic approach to propose a new theoretical framework for this once traditional sector; one which reconciles current thinking in strategic management with natural resource management.

Akhuwat's Experiment Innovative Institute

The second edition of the *Impact Evaluation in Practice* handbook is a comprehensive and accessible introduction to impact evaluation for policy makers and development practitioners. First published in 2011, it has been used widely across the development and academic communities. The book incorporates real-world examples to present practical guidelines for designing and implementing impact evaluations. Readers will gain an understanding of impact evaluations and the best ways to use them to design evidence-based policies and programs. The updated version covers the newest techniques for evaluating programs and includes state-of-the-art implementation advice, as well as an expanded set of examples and case studies that draw on recent development challenges. It also includes new material on research ethics and partnerships to conduct impact evaluation. The handbook is divided into four sections: Part One discusses what to evaluate and why; Part Two presents the main impact evaluation methods; Part Three addresses how to manage impact evaluations; Part Four reviews impact evaluation sampling and data collection. Case studies illustrate different

applications of impact evaluations. The book links to complementary instructional material available online, including an applied case as well as questions and answers. The updated second edition will be a valuable resource for the international development community, universities, and policy makers looking to build better evidence around what works in development.

The Decision Tree Framework Pearson Education India

Social Studies for Secondary Schools: Teaching to Learn, Learning to Teach, Second Edition integrates discussions of educational goals and the nature of history and social studies with practical ideas for organizing social studies curricula, units, lessons, projects, and activities. A major theme woven throughout the text is that what we choose to teach and the way we teach reflect our broader understanding of society, history, and the purposes of social studies education. Each chapter opens with a broad question about social studies education; provides many examples of lessons, including lesson ideas developed by new and experienced middle school and high school social studies teachers; features a rich variety of teaching, learning, and classroom activities designed to provoke discussion and illustrate different approaches to teaching social studies; and concludes with essays about related social studies topics. Part I focuses on philosophical issues, social studies goals and standards, and the design of social studies curricula. Part II examines and offers examples of strategies for planning units and lessons. Part III explores topics, such as thematic and interdisciplinary teaching, a project approach to social studies, as well as

assesses student learning and one's own performance as a teacher, and provides a guide to social studies resource materials and organizations. New in the Second Edition: *Every chapter has been updated and includes a number of new lesson ideas. *The lesson ideas are designed especially to help beginning teachers address learning standards; work in inclusive settings; and promote literacy and the use of technology in social studies classrooms. *Sample activities developed with members of the Hofstra New Teachers Network reflect the current focus on document-based instruction and assessment, and can serve as tools for assessing student learning. *Increased attention is given to project-based social studies instruction and to multicultural education. Intended as a text for undergraduate and graduate preservice social studies methods courses, this text is also useful for in-service training programs, as a reference for new social studies teachers, and as a resource for experienced social studies educators who are engaged in rethinking their teaching practice.

Technical Paper Springer Science & Business Media

Why has an economy that has done so many things right failed to grow fast? *Under-Rewarded Efforts* traces Mexico's disappointing growth to flawed microeconomic policies that have suppressed productivity growth and nullified the expected benefits of the country's reform efforts. Fast growth will not occur doing more of the same or focusing on issues that may be key bottlenecks to productivity growth elsewhere, but not in Mexico. It will only result from inclusive institutions that effectively protect workers against risks, redistribute towards those in need, and

simultaneously align entrepreneurs' and workers' incentives to raise productivity. [Longman Geography 8](#) Routledge CONTRIBUTIONS TO THE SOCIOLOGY OF LANGUAGE brings to students, researchers and practitioners in all of the social and language-related sciences carefully selected book-length publications dealing with sociolinguistic theory, methods, findings and applications. It approaches the study of language in society in its broadest sense, as a truly international and interdisciplinary field in which various approaches, theoretical and empirical, supplement and complement each other. The series invites the attention of linguists, language teachers of all interests, sociologists, political scientists, anthropologists, historians etc. to the development of the sociology of language.

Research in Education World Bank Publications

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across

segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.
