*The Poop Book!* Feral House

iParenting Media Award Winner Ryan is scared to use the potty. He is afraid to have a poop, because he's afraid it's going to hurt. He does NOT want to go. This story, along with Ryan's "poop program,"

will help young children gain the confidence they need to overcome this common problem and establish healthy habits. Includes a Note to Parents by the author, From the Note to Parents: The book includes a "poop program" that I use with children between the ages of 3 and 6. While the program is ostensibly for the main character, my hope is that your child will want to follow these steps as well. How you approach the program will vary somewhat depending on your child's age. Most 3- to 4-year-olds do not need to do the program in a formal way. Instead, you can incorporate parts of the program into your daily routine—make the needed dietary changes, reward successful pooping with stickers, and consider reviewing how poops come out of the body. Most 5- to 6-year-olds are interested in doing the full program, though it is still important to be flexible. For example, if a 5-year-old does not want to do Potty Practice, I would adjust things accordingly.

**All about Poop** Charlesbridge

Is "The Origin of Feces" a Darwinian concern? Perhaps not, but it is the title to the preface of this tongue-in-cheek and unexpectedly revealing exploration of human behavior by the webmaster behind the popular PoopReport.com. This book is not a history of poop, but a study of today. Its goal is to understand how poop affects us, how we view it, and why; to appreciate its impact from the moment it slides out of our anal sphincters to the moment it enters the sewage treatment plant; to explore how we've arrived at this strange discomfort and confusion about a natural product of our bodies; to see how this contradiction—the natural as unnatural—shapes our minds, relationships, environment, culture, economics, media, and art. Paul Provenza, the director of The Aristocrats, says in his foreword: "It's shocking to think that a book about poop can be considered an act of courage. But it is. Most of us have knee-jerk responses to the topic that we are not even aware of. Attitudes that, like the awful stench of poop itself, permeate all of society and culture. This book has some very profound and beautiful things to say. It takes a dirty, smelly, unpleasant subject like shit and brings forth ideas that are empowering, dignifying and life affirming."

Did lead pipes cause the fall of the Roman Empire? How many toilets were in the average Egyptian pyramid? How did a knight wearing fifty pounds of armor go to the bathroom? Was poor hygiene the last straw before the French Revolution? Did Thomas Crapper really invent the modern toilet? How do astronauts go in space? History finally comes out of the water-closet in this exploration of how people's need to relieve themselves shaped human development from ancient times to the present. Throughout time, the most successful civilizations were the ones who realized that everyone poops, and they had better figure out how to get rid of it! From the world's first flushing toilet invented by ancient Minoan plumbers to castle moats in the middle ages that used more than just water to repel enemies, Sarah Albee traces human civilization using one revolting yet fascinating theme.
