*The Power of Pull* Princeton University Press

This book takes a fresh look at current issues in corporate social responsibility (CSR) with a special focus on emerging economies. In particular, it includes dedicated chapters on the theory of CSR, related principles and values, and insights from cross-generational investigations. In turn, the second part of the book examines the relation between financial performance and social responsibility in different industries and types of organizations. The third part presents cases involving emerging economies, and addresses reporting, auditing and accounting, as well as sector-specific issues for e.g. retailing and banking. Lastly, the book tackles the aspects of financial performance and taxation in a number of case studies and practical examples. Overall the book provides cutting-edge insights into the theory and practice of CSR from European countries that can be considered emerging or developing.

Industrie 4.0 and the Internet of Things have been positioned on the international stage as important initiatives of a promising future: Who is dealing in data from the digital factory? Germany has its

"Plattform Industrie 4.0", China "Made in China 2025" and the USA the "Industrial Internet Consortium". Who is leading the fourth industrial revolution? The digitalization of industry is changing the global economy and society. Technology is supplying the opportunities to do so. Humans must decide just how far artificial intelligence should go, and what machines should learn – to create new and improved work instead of fewer jobs. In addition to Ulrich Sendler and eight German industry and research experts, the CEO of Xinhuanet in Beijing has also contributed to this book.

The management of environmental or green issues has become a key concern for many companies. Not only do green issues influence how an organisation is seen and how its reputation is judged, it has huge implications for the organisation's success, brand values and the sales decisions of consumers towards its products. This book contains much practical advice, with case studies, and will guide the modern organisation on how to channel environmental issues to gain competitive advantage.

*Does Economic Space Matter?* John Wiley & Sons

This book discusses wide topics related to current issues in economic growth and development, international trade, macroeconomic and financial stability, inflation, monetary policy, banking, productivity, agriculture and food security. It is a collection of seventeen research papers selected based on their quality in terms of contemporary topic, newness in the methodology, and themes. All selected papers have followed an empirical approach to address research issues, and are segregated in five parts. Part one covers papers related to fiscal and price stability, monetary policy and economic growth. The second part contains works related to financial integration, capital market volatility and macroeconomic stability. Third part deals with issues related to international trade and economic growth. Part four covers topics related to productivity and firm performance. The final part discusses issues related to agriculture and food security. The book would be of interest to researchers, academicians as a ready reference on current issues in economics and finance.

*Journal of the Society of Chemical Industry* John Wiley & Sons

This volume contains a selection of the most notable contributions delivered at the research conference "Industrial Relations and Conflict Management: Different Ways of Managing Conflict," which was hosted by the Nether lands School of Business in July 1980. Held at Nijenrode Castle, the confer ence brought together an international gathering of thirty-five of the most distinguished scholars in these fields to present research papers and to en gage in round-table discussions. One of

the principal aims of the conference was to explore cross-links and differences between the areas of conflict management and industrial relations in an international context. The book opens with a chapter by George Strauss, who provides an introduction to and an overall view of the subject matter covered. The chapters that follow in Part I deal with differing conflict conditions and definitions and their implications for managing conflict. The manifestations of conflict and different modes of conflict management are the subject of the chapters in Part II. In Part III, three empirical studies of conflict are discussed. Part IV is concerned with comparative industrial relations, while value issues and conflict are the focus of Part V. Finally, in the Epilogue the participant feedback regarding the conference is reviewed.

While Human-Animal Studies is a rapidly growing field in modern history, studies on this topic that focus on the Ancient World are few. The present volume aims at closing this gap. It investigates the relation between humans, animals, gods, and things with a special focus on the structure of these categories. An improved understanding of the ancient categories themselves is a precondition for any investigation into the relation between them. The focus of the volume lies on the Ancient Near East, but it also provides studies on Ancient Greece, Asia Minor, Mesoamerica, the Far East, and Arabia.

Design and Operation of Production Networks for Mass Personalization in the Era of Cloud Technology draws on the latest industry advances to provide everything needed for the effective implementation of this powerful tool. Shorter product lifecycles have increased pressure on manufacturers through the increasing variety and complexity of production, challenging their workforce to remain competitive and profitable. This has led to innovation in production network methodologies, which together with opportunities provided by new digital technologies has fed a rapid evolution of production engineering that has opened new solutions to the challenges of mass personalization and market uncertainty. In addition to the latest developments in cloud technology, reference is made to key enabling technologies, including artificial intelligence, the digital twin, big data analytics, and the internet of things (IoT) to help users integrate the cloud approach with a fully digitalized production system. Presents diverse cases that show how cloud-based technologies can be used in different ways as part of the standard operation of global production networks Provides detailed reviews of new technologies like the digital twin, big data analytics, and blockchain to provide context on the role of cloud technologies in a fully digitalized system Explores future trends for cloud technology and production engineering

**Animals and their Relation to Gods, Humans and Things in the Ancient World** Macmillan

The book's 30 chapters are divided into three sections – international trade, economic development, macroeconomics and finance – and focus on the frontier issues in each. Section I addresses analytical issues relating to trade-environment linkage, capital accumulation for pollution abatement, possibility of technology diffusion by multinational corporations, nature of innovation inducing tariff protection, effects of import restriction and child labour, the links between exchange rate, direction of trade and financial crisis—the implications for India and global economic crisis, financial institutions and global capital flows and balance of payments imbalances. Section II

consists of discussions on the causes of widespread poverty persisting in South Asia, development dividend associated with peace in South Asia, issues of well-being and human development, implications for endogenous growth through human capital accumulation on environmental quality and taxation, the rationale for a labour supply schedule for the poor, switching as an investment strategy, the role of government and strategic interaction in the presence of information asymmetry, government's role in controlling food inflation, inter-state variations in levels and growth of industry in India, structural breaks in India's service sector development, and the phenomenon of wasted votes in India's parliamentary elections. Section III deals with the effectiveness of monetary policy in tackling economic crisis, the effective demand model of corporate leverages and recession, the empirical link between stock market development and economic growth in cross-country experience in Asia, an empirical verification of the Mckinnon-Shaw hypothesis for financial development in India, the dynamics of the behaviour of the Indian stock market, efficiency of non-life insurance companies, econometric study of the causal linkage between FDI and current account balance in India and the implications of contagious crises for the Indian economy.

Connect, engage, motivate, and inspire using top coaching techniques Coaching Up! is about inspiring those who matter to you to achieve peak performance. Whether you are a coach, a business leader, a civic activist, a teacher, a counselor, or a parent, this book will offer you a powerful, highly effective way to connect to the people you care about and move them forward toward their best selves. In sports, coaches have developed ways of connecting with their players quickly in the "heat of the battle," inspiring them to perform to their fullest potential and "leave it all on the field." Interestingly, although these techniques have not been codified, great coaches have independently developed remarkably similar models. This book aligns these techniques and distills their essence into a fundamental skill set that anyone can use to connect with, support, and inspire his or her colleagues, teammates, friends, and family members. At its foundation, great coaching is based on a solid set of techniques that can be applied to all areas of life. Essentially, those skills boil down to forging authentic connections, providing genuine support, and offering concise direction. While our everyday pressures may be less intense than those of a championship, the long-term game is even more important. Why not borrow from the best to develop the skills and abilities to win every day? Inspire and motivate people to higher performance Improve communication in high-stakes situations Be more effective both professionally and socially Getting inside the way great coaching works gives you an unparalleled glimpse at the core of inspiration. A great coach can make the difference between a mediocre player and a world champion. What would that difference look like if you could inspire every colleague in your business? Everyone who matters to you in your personal life? You can be the source of empowerment and motivation that helps the people around you reach higher, go further, and achieve more. Coaching Up! gives you the game plan—and shows you how to run the plays.

This book offers a collection of distinguished contributions that identify current growth accelerators in India, and suggest policies and strategies to make India's growth more sustainable and inclusive. The papers are divided into three sections, the first of which focuses on issues related to industrial growth in India. The discussions include India's industrial development (manufacturing, construction and mining); role of manufacturing; global value chains; and of environment in industrial development. In turn, section II deals with issues related to trade and FDI as accelerators of India's growth. The respective chapters explore the changing patterns of trade, impacts of technology, and spill-over effects of FDI, to name but a few. Lastly, the third section discusses employment-related issues like measurement of labour input, the dichotomy of the Indian labour market, the nature of firms and employment generation, and impacts of technology on employment. Given its scope and focus, the book offers an invaluable resource for researchers and policymakers alike.

How a vast network of shadow credit financed European growth long before the advent of banking Prevailing wisdom dictates that, without banks, countries would be mired in poverty. Yet somehow much of Europe managed to grow rich long before the diffusion of banks. *Dark Matter Credit* draws on centuries of cleverly collected loan data from France to reveal how credit abounded well before banks opened their doors. This incisive book shows how a vast system of shadow credit enabled nearly a third of French families to borrow in 1740, and by 1840 funded as much mortgage debt as

the American banking system of the 1950s. *Dark Matter Credit* traces how this extensive private network outcompeted banks and thrived prior to World War I—not just in France but in Britain, Germany, and the United States—until killed off by government intervention after 1918. Overturning common assumptions about banks and economic growth, the book paints a revealing picture of an until-now hidden market of thousands of peer-to-peer loans made possible by a network of brokers who matched lenders with borrowers and certified the borrowers' creditworthiness. A major work of scholarship, *Dark Matter Credit* challenges widespread misperceptions about French economic history, such as the notion that banks proliferated slowly, and the idea that financial innovation was hobbled by French law. By documenting how intermediaries in the shadow credit market devised effective financial instruments, this compelling book provides new insights into how countries can develop and thrive today.

In a radical break with the past, information now flows like water, and we must learn how to tap into its stream. Individuals and companies can no longer rely on the stocks of knowledge that they've carefully built up and stored away. Information now flows like water, and we must learn how to tap into the stream. But many of us remain stuck in old practices -- practices that could undermine us as we search for success and meaning. In this revolutionary book, three doyens of the Internet age, whose path-breaking work has made headlines around the world, reveal the adjustments we must make if we take these changes seriously. In a world of increasing risk and opportunity, we must understand the importance of pull. Understood and used properly, the power of pull can draw out the best in people and institutions by connecting them in ways that increase understanding and effectiveness. Pull can turn uncertainty into opportunity, and enable small moves to achieve outsized impact. Drawing on pioneering research, *The Power of Pull* shows how to apply its principles to unlock the hidden potential of individuals and organizations, and how to use it as a force for social change and the development of creative talent. The authors explore how to use the power of pull to:

- Access new sources of information
- Attract likeminded individuals from around the world
- Shape serendipity to increase the likelihood of positive chance encounters
- Form creation spaces to drive you and your colleagues to new heights
- Transform your organization to adapt to the flow of knowledge

*The Power of Pull* is essential reading for entrepreneurs, managers, and anybody interested in understanding and harnessing the shifting forces of our networked world.
