"... from the writings of an early modern nobody emerges a compelling study of the puritan psyche and way of life. Woodford's noteworthiness lies in the sheer consistency of his outlook. Every aspect of experience -- from thoughts and feelings to the operation of the cosmos -- was scrutinized through the same lens of experimental predestinarianism. His Calvinist worldview centred on the belief in an omnipotent and omniscient creator, whose will dictated the history of the universe. Woodford apparently supported the full supralapsarian position on predestination: God had determined mankind's fate before the creation, for

purely His own reasons condemning the majority to hell and electing a minority to heaven. Godly professors such as Woodford insisted on the possibility of achieving assurance of their elect status during life."--P. 11.

Kidnapped and sold into slavery in the American South, freeman Solomon Northup spent twelve years in bondage before being freed. *Twelve Years a Slave* is Northup's moving memoir, revealing unimaginable details of the horrors he faced as a slave on Southern plantations, and his unshakable belief that he would return home to his family. Written in the year after Northup was freed and published in the wake of Harriet Beecher Stowe's *Uncle Tom's Cabin*, Northup's story was quickly taken up by abolitionist groups and news organizations as part of the fight against slavery, and continues to resonate more than a century after the end of the American Civil War.

Today our societies face great challenges with water, in terms of both quantity and quality, but many of these challenges have already existed in the past. Focusing on Asia, *Water Societies and Technologies from the Past and Present* seeks to highlight the issues that emerge or re-emerge across different societies and periods, and asks what they can tell us about water sustainability. Incorporating cutting-edge research and pioneering field surveys on past and present water management practices, the interdisciplinary contributors together identify how societies managed water resource challenges and utilised water in ways that allowed them to evolve, persist, or drastically alter their environment. The case studies, from different periods, ancient and modern, and from different regions, including Egypt, Sri Lanka, Cambodia, Southwest United States, the Indus Basin, the Yangtze River, the Mesopotamian floodplain, the early Islamic city of Sultan Kala in Turkmenistan, and ancient Korea, offer crucial empirical data to readers interested in comparing the

dynamics of water management practices across time and space, and to those who wish to understand water-related issues through conceptual and quantitative models of water use. The case studies also challenge classical theories on water management and social evolution, examine and establish the deep historical roots and ecological foundations of water sustainability issues, and contribute new grounds for innovations in sustainable urban planning and ecological resilience.

Psychologist John Gottman has spent twenty years studying what makes a marriage last. Now you can use his tested methods to evaluate, strengthen, and maintain your own long-term relationship. This breakthrough book guides you through a series of self-tests designed to help you determine what kind of marriage you have, where your strengths and weaknesses are, and what specific actions you can take to help your marriage. You'll also learn that more sex doesn't necessarily improve a marriage, frequent arguing will not lead to divorce, financial problems do not always spell trouble in a relationship, wives who make sour facial expressions when their husbands talk are likely to be separated within four years and there is a reason husbands withdraw from arguments—and there's a way around it. Dr. Gottman teaches you how to

recognize attitudes that doom a marriage—contempt, criticism, defensiveness, and stonewalling—and provides practical exercises, quizzes, tips, and techniques that will help you understand and make the most of your relationship. You can avoid patterns that lead to divorce, and—Why Marriages Succeed or Fail will show you how.

Three out of five Americans, both Republicans and Democrats, feel our country is headed in the wrong direction. America is at the edge, a critical place at which we can either renew and revitalize or give in and lose that most precious American ideal—democracy—and along with it the freedom, fairness, and opportunities it assures. Democracy's Edge is a rousing battle cry that we can—and must—act now. From Jefferson to Eisenhower, presidents from both parties have warned us of the danger of letting a closed, narrow group of business and government officials concentrate power over our lives. Yet today, a small and unrepresentative group of people is making vital decisions for all of us. But this crisis is only a symptom, Lappé argues. It's a symptom of thin democracy, something done to us or for us, not by or with us. Such democracy is always at risk of being stolen by private interests or extremist groups, left and right. But there is a solution. The answer, says Lappé, is Living Democracy, a powerful yet often invisible citizens' revolution surging in communities across America. It's not random, disjointed activism but the emergence of a new historical stage of democracy in which Americans realize that democracy isn't something we have but something we do. Either we live it or lose it, says Lappé.

New York Times bestseller More than 100,000 copies in print Completed just two days before Louis Zamperini's death at age ninety-seven, *Don't Give Up, Don't Give In* shares a lifetime of wisdom, insight, and humor from "one of the most incredible American lives of the past century" (People). Zamperini's story has touched millions through Laura Hillenbrand's biography *Unbroken* and its blockbuster movie adaptation directed by Angelina Jolie. Now, in his own words, Zamperini reveals with warmth and great charm the essential values and lessons that sustained him throughout his remarkable journey. He was a youthful

troublemaker from California who turned his life around to become a 1936 Olympian. Putting aside his track career, he volunteered for the army before Pearl Harbor and was thrust into World War II as a B-24 bombardier. While on a rescue mission, his plane went down in the middle of the Pacific Ocean, where he survived against all odds, drifting two thousand miles in a small raft for forty-seven days. His struggle was only beginning: Zamperini was captured by the Japanese, and for more than two years he courageously endured torture and psychological abuse in a series of prisoner-of-war camps. He returned home to face more dark hours, but in 1949 Zamperini's life was transformed by a spiritual rebirth that would guide him through the next sixty-five years of his long and happy life. Louis Zamperini's *Don't Give Up, Don't Give In* is an extraordinary last testament that captures the wisdom of a life lived to the fullest.
