*In the Footsteps of Rome* is an epic tale that validates the United States' vulnerability to a major attack by its enemies. The gripping story begins on the battlefields of the Middle East and Africa, where independent groups are fighting for the overthrow of their governments. A new, well-financed organization emerges with the objective of uniting these disparate groups into an effective jihadist force, having the ambitious goal of establishing a worldwide Muslim Caliphate. The organization's effectiveness is enhanced by its acquisition of an advanced technology capable of inflicting significant damage on the United States. For the U.S., the end result, like that of Rome, is chaos and the erosion of its system of government. *In the Footsteps of Rome* reflects Philip Tarnoff's first-hand knowledge of both government agencies and the private sector. His career experience includes work with state and federal agencies, most recently focusing on the operation of America's highway transportation system, a pursuit for which he has received many awards. As our government pours large sums of money into defense while its infrastructure crumbles, it becomes increasingly clear that the U.S. is following the path of the Rome, whose investments in military superiority dwarfed expenditures on the Empire's other critical needs. Tarnoff's first book, *The Road Ahead*, which discussed necessary improvements in transportation operations, has received universal acclaim. It is now followed by this work of fiction, which exposes the weaknesses of a deteriorating society.

Revised and updated to address shifts in the climate of bullying in schools and online, this timely work suggests anti-bullying approaches that are concrete, practical, and grounded in research. In this deeply insightful work, nationally renowned bullying expert Elizabeth Kandel Englander offers sensible perspectives on student social behavior and equips educators and parents with effective strategies to identify and address bullying. This second edition of *Bullying and Cyberbullying* reveals how enormous social changes, increased digital connections, and a global pandemic have indelibly altered the psychological world of children—and in turn shaped their peer interactions. Englander notes that effective school bullying prevention and intervention is rooted in a solid understanding of child development, social structures in schools, and the connections between online behavior and in-school socializing. Building on continuing research on smartphone and social media usage, online privacy, and sexting and other risky behaviors, this updated edition prepares educators and parents to identify gateway behaviors, anticipate bias-based bullying, and respond to aggression and harassment. Englander offers sage advice for

promoting resilience, strong friendships, and healthy technology use, among other prosocial behaviors that can avert bullying among students. This much-needed work provides an accessible framework for understanding and responding effectively to bullying and offers suggestions for collaboration between educators and parents.
