Annual Report of the Superintendent of the Insurance Department Darakwon

Powerful Earthquake Triggers Tsunami in Pacific. Hurricane Katrina Makes Landfall in the Gulf Coast. Avalanche Buries Highway in Denver. Tornado Touches Down in Georgia. These headlines not only have caught the attention of people around the world, they have had a significant effect on IT professionals as well. As technology continues to become more integral to corporate operations at every level of the organization, the job of IT has expanded to become almost all-encompassing. These days, it's difficult to find corners of a company that technology does not touch. As a result, the need to plan for potential disruptions to technology services has increased exponentially. That is what Business Continuity Planning (BCP) is: a methodology used to create a plan for how an organization will recover after a disaster of various types. It takes into account both security and corporate risk management tactics. There is a lot of movement around this initiative in the industry: the British Standards Institute is releasing a new standard for BCP this year. Trade shows are popping up covering the topic. * Complete coverage of the 3 categories of disaster: natural hazards, human-caused hazards, and accidental and technical hazards. * Only published source of information on the new BCI standards and government requirements. * Up dated information on recovery from cyber attacks, rioting, protests, product tampering, bombs, explosions, and terrorism.

Annual Report and Statistical Data - Division of Insurance

A complete guide to successful trade shows and exhibitions Trade shows, consumer shows, product launches, sporting events, and

other opportunities to interact face-to-face with customers have become an important part of the marketing mix. Recent studies show that the percentage of the total marketing communications budget spent on event marketing ranged from over 9% to a staggering 29%. In 2003, North America alone hosted over 13,000 trade and consumer shows, each one with hundreds of exhibitors, and thousands of visitors. Beyond traditional trade shows, there are countless other opportunities for exhibitors to interact with their customers directly and improve the bottom line, such as mall displays, corporate events, road shows, and permanent displays. Well chosen and executed events can shorten the sales cycle significantly and put you miles ahead of the competition, but you need to have an exhibit plan that's well thought out, organized, and executed. While some large organizations have a dedicated exhibit staff, often the role of exhibit management lands on the desk of an unsuspecting, overworked, or unwilling sales or marketing person who needs to get results from their exhibit investment, but doesn't know where to start. The Power of Exhibit provides the step-by-step advice you need to exhibit successfully. This definitive guide to trade shows and other event marketing shows how to set objectives, budget for your event and measure its success in ROI, choose the right show and find the right audience, turn leads into business, design booths, work the show, gather information and intelligence, and much more.
