Andreas Herzau's photographic travel book records an eight-day journey that he undertook by taxi from Calcutta to Mumbai (formerly known as Bombay). It provides impressive insights into the culture and lifestyles of central India and is a close-up view of the country's complex and stratified society. This is a truly fascinating document of reportage and narration that follows the hugely popular 'road movie' genre and is contemporary and fresh in its images.

A few years after the American declaration of independence, the first American ships set sail to India. The commercial links that

American merchant mariners established with the Parsis of Bombay contributed significantly to the material and intellectual culture of the early Republic in ways that have not been explored until now. This book maps the circulation of goods, capital and ideas between Bombay Parsis and their contemporaries in the northeastern United States, uncovering a surprising range of cultural interaction. Just as goods and gifts from the Zoroastrians of India quickly became an integral part of popular culture along the eastern seaboard of the U.S., so their newly translated religious texts had a considerable impact on American thought. Using a wealth of previously unpublished primary sources, this work presents the narrative of American-Parsi encounters within the broader context of developing global trade and knowledge.
